

GUIDE TO BS EN 12813

Introduction

BS 4551 Specification for ready-mixed building material was withdrawn at the end of January 2005 and replaced by BS EN 998 Parts 1 and 2 Specification for concrete for housing and BS EN 12813 Screed material and floor screeds - Screed material - Properties and requirements which was published in November 2005, and is now the product standard for the specification of screed material. BS EN 998 does not cover screed material (traditionally screed material has been specified in accordance with the requirements prescribed in Section 6 of BS 4551) therefore specific of screed material need to become familiar with the requirements of BS EN 12813.

A further change that occurred at the same time is that the testing Standard BS 4551 Methods of testing materials

screeds and grouts will be largely replaced by a new series of European test methods, which have been published as BS EN 12610 Methods of test for mortar for masonry, a multi part Standard. BS 4551 has been reworded as a single part Standard to cover a limited number of physical test methods (which have not been superseded by BS EN 12610) and chemical test methods currently contained within Part 2 of BS 4551, however all references to screed material have been deleted. A new series of test methods for screed material have been published as BS EN 12813. Therefore from February 2005 there has been a complete separation of both product and testing Standards for mortar and screed material.

The new Standards were applicable to screed material are:

BS EN 12813	Screed material and floor screeds - Definitions
BS EN 12813	Screed material and floor screeds - Screed material - Properties and requirements
BS EN 12813-1	Methods of test for screed materials - Part 1: Sampling, making and curing specimens for test
BS EN 12813-2	Methods of test for screed materials - Part 2: Determination of flexural and compressive strength
BS EN 12813-3	Methods of test for screed materials - Part 3: Determination of wear resistance (Abrasion)
BS EN 12813-4	Methods of test for screed materials - Part 4: Determination of wear resistance (RCR)
BS EN 12813-5	Methods of test for screed materials - Part 5: Determination of wear resistance to rolling wheel of screed material for wearing floor
BS EN 12813-6	Methods of test for screed materials - Part 6: Determination of surface hardness
BS EN 12813-7	Methods of test for screed materials - Part 7: Determination of rapid resistance to rolling wheel of screed material with floor coverings
BS EN 12813-8	Methods of test for screed materials - Part 8: Determination of bond strength

Table 1. Standards for screed material

A series of British Standards dealing with the subject of the design and installation (workmanship) of screeds are currently available. These have been revised to take account

of changes in standardisation and are published as Code of practice.
