The Medical Guide for Third World Travelers Bradford L. Dessery, Marc R. Robin, 1992 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), *Current Catalog* National Library of Medicine (U.S.), 1992 First multi year cumulation covers six years 1965-70 **TRIPS and Access to Medicines** Renata Curzel, 2020-12-10 Although ideally a patent system for pharmaceuticals should serve to incentivize research into the development of new medicines the COVID 19 pandemic has exposed the equal importance of drug access and affordability This book by focusing on the Brazilian rule which makes the grant of pharmaceutical patents dependent on the prior consent of the National Health Surveillance Agency ANVISA shows how the Brazilian model affords an example for other countries to follow in dealing with tensions between patent protection and the right to healthcare Based on an empirical study in which the author examined 147 reports issued by ANVISA as a basis for its decisions the book deals with such central questions concerning the interface of regulation and innovation in the patent system as the following compatibility between ANVISA's prior consent mechanism and the Trade Related Aspects of Intellectual Property Rights TRIPS Agreement how evergreening and trivial patents undermine public health and access to medicines ways of correcting abuses of patent rights and controlling quality of patents and the discourse on health as a human right Along with her examination of ANVISA reports the author analyzes how Article 229 C LPI which introduced the need of ANVISA's prior consent to the patent grant of pharmaceuticals in Brazil has been interpreted in Brazilian case law Interviews with Brazilian experts are also included In its commitment to harmonizing patent rights and the right to access of affordable medicines Brazil's patent system for pharmaceuticals stands out as a workable response to the basic problem of access to medicines in the developing world By describing the successes and failures in the Brazilian policy of promoting drug access this book helps policymakers in developing and emerging countries to better explore TRIPS flexibilities when dealing with similar problems and provides practitioners in the law of the World Trade Organization patent law competition law and health law with a guide to how a more equitable pharmaceutical patenting system could work in practice Cancer Screening in the Developing World Madelon L. Finkel, PhD, 2018-05-01 Worldwide cancer is responsible for one in eight deaths more than AIDS tuberculosis and malaria combined This global burden starkly illustrates the inequality between the developed and the developing world While the majority of people living in developed countries receive timely treatment those living in developing countries are not as fortunate and their survival rates are much lower not only due to delays in diagnosis but also to a lack of personnel a paucity of treatment facilities and the unavailability of many medications Routine screening a mainstay in the developed world could greatly increase the likelihood of identifying individuals with early stage cancers and thus reduce the number of people who present with advanced disease This book represents a critical addition to the literature of global health studies Focusing on cervical breast and oral cancers these case

studies highlight innovative strategies in cancer screening in a diverse array of developing countries The authors discuss common issues and share how obstacles medical economic legal social and psychological were addressed or overcome in specific settings Each chapter offers an empirical discussion of the nature and scope of a screening program the methodology used and its findings along with a candid discussion of challenges and limitations and suggestions for future efforts
