

HUMAN EVOLUTION: NOTES

THE PLACE OF HUMANS IN THE ANIMAL KINGDOM

- Humans are **mammals**, belonging to the class **Mammalia**, because their bodies are covered in hair and they suckle their young. All mammals also have three ossicles (bones) in the middle ear.
- Humans are classified in the class **Mammalia**, order **Primates**. Primates include humans, apes, orangutans, gorillas and chimpanzees.
- The order **Primates** includes the superfamily **Hominoidae** that is subdivided into two families, i.e. **Hominidae** (Great Apes and humans) and **Hylobatidae** (gibbons).
- Family **Hominidae** is divided into two subfamilies, i.e. **Ponginae** and **Homininae**.
- Some scientists divide the subfamily **Homininae** into two more tribes, i.e. **Hominini** and **Gorillini**.
- Humans, gorillas and chimpanzees fall under the subfamily **Homininae** and the orangutans are part of **Ponginae**.
- Humans belong to the genus **Homo**.

All members of the family **Hominidae** are known as **hominids** (Great Apes and humans). However, certain sources refer to hominids as only humans and their fossil ancestors (the Great Apes excluded). A new term, **hominins**, is currently used by scientists, which refers to humans and their fossil ancestors.

NB: In this study guide we will use the term **hominin** for bipedal humans and their fossil ancestors. The term **hominid** will be used when reference is made to the Great Apes as well as humans and their fossil ancestors. **Great Apes** are also often referred to as **African Apes**.

Individuals of the genera **Ardipithecus** and **Australopithecus** as well as early **Homo**-species are considered fossil ancestors of modern humans. Modern humans are classified in the genus and species **Homo sapiens**. These three genera have ape-like as well as human characteristics and they are sometimes referred to as 'ape-men'. See p. 9 for a more detailed discussion of these three genera.

Egyptian and Nubian individuals from five different archaeological sites the research addresses patterns of everyday life as they relate to social inequality agency and practice Beyond osteological indicators of activity and dietary patterns this book also discusses additional methods that can be pursued to draw attention to daily life Lastly this book also highlights the applicability of and potential contribution that practice theory can make to this area of research *Human Evolution* Milford H.
