important area of work In recent decades the scope of disarmament has broadened to encompass also conventional weapons including through the adoption of rules and regulations to govern arms transfers and measures to eliminate specific munitions from stockpiles and to destroy explosive remnants of war There have also been four generations of programmes to address small arms and light weapons at national or sub national level through disarmament demobilisation and reintegration DDR programmes during and following the end of armed conflict While an internationally accepted definition of disarmament does not yet exist it is widely agreed that disarmament encompasses or interrelates with prohibitions and restrictions on the development production stockpiling testing and transfer of weapons and on their destruction In addition to clarifying these elements chapters of this guide will also consider the relationship between disarmament and the law of armed conflict and with the United Nations Security Council human security public health and non state actors

Non-Binding Norms in International Humanitarian Law Emily Crawford,2021-12-23 This monograph examines and analyses the phenomenon of non binding instruments also known as soft law in the law of armed conflict or international humanitarian law In the past 30 years there have been several non binding instruments created designed as either best practice guidelines or re statements of applicable law These instruments are not treaties but they nevertheless put themselves forward as authoritative statements of what the law is and in some instances what the law should be Soft law instruments can be dynamic prompt and responsive measures to address pressing issues in armed conflicts By drawing on the skill of a small group of experts these instruments can be debated and drafted in a timelier manner than if these issues were to be left to the international community of 194 States to resolve Furthermore because these instruments do not have to be sent for debate to an international conference of States it means that the provisions are not subject to the usual revisions reservations and dilutions that come with attempting to reach consensus However there are potential and actual problems with these instruments and the processes that bring them to fruition and how they are received in practice by States and other stakeholders This volume looks at the benefits and drawbacks for States and non State actors with regards to soft law whether they are effective additions to the law of armed conflict analysing the development through the lens of theories of legitimacy and legality in international law
