

POWERLINE Energy Management System™

INSTALLATION & SERVICE MANUAL

Display Panel

The **PowerLine BMS™** is a specialized power distribution and energy management system intended to be used in recreational vehicles. The Control Module is housed in the standard main distribution panel, a sheet metal enclosure with removable front panel. The Display Panel is mounted to a wall or suitable surface remotely from the distribution panel. It provides a system of energy management to minimize the over-loading and tripping of circuit breakers.

Energy Management - the **PowerLine BMS™** automatically senses the available power to the vehicle. It determines whether it is connected to a 120 VAC, 30 Amp shore power source, 240 VAC, 50 Amp shore power source, or Generator source. Depending upon available power, it controls the operation of the rear air conditioner fan and compressor using low voltage switching and also controls the refrigerator by switching the 120 VAC supply. If the available power source is 120 VAC, 30 Amp shore power it attempts to keep the total 120 volt current draw to less than 30 Amps.

CAUTION

The **POWERLINE Energy Management System™** is a specialized power switching center. Power from the 120/240 volt power source is fed into the box. The potential of lethal electrical shock is present in this box. Inadvertent shorts at this box could result in damage and/or injury. All servicing of this box should be done *only* by a qualified Service Technician.

Diagnostic tools required: Low current Test Light, Accurate Voltmeter (digital readout preferred), Clamp-on AC ammeter.
