## ***Part 1 (Chapters 1-4)***

### **Chapter 1**

#### **Thinking Critically About History**

**Joel Spring** wrote this book with the intention of combining a particular approach with a more comprehensive perspective of the whole idea of history education. We the readers will be given a variety of historical interpretations and issues and we must decide which interpretation is the right one. Why must we interpret history? Many historians agree on dates and personalities involved in many historical events, however they have a hard time agreeing on the motives behind everything. Numerous questions embody the issues debated in the writing of history. Some of the questions debated throughout the course of history are: Were public schools established so that all people would be able to protect their political and economic right? Were they established to protect the power of the upper echelon of society who control the economic and political ideas taught to students in schools? Were they established to assure the dominance of the Protestant Anglo-American culture over other considered "inferior" cultures such as Native American, Irish American and African American cultures? Finally, were public schools necessary to guarantee the education of all people?

Many of the answers to these questions have important implications for a person's future in choices that one makes and the actions of how they handle him/herself. The answers help form impressions and feelings about the past for each individual person. Many people do not remember details of history, however they do develop feelings about past events. Thinking about history involves both intelligent contemplation of contradictory translations, issues surrounding schools, and reflections of how one feels about past events. A person's knowledge, impressions, and emotions regarding the past have forced future actions. Individuals often make decisions based on what they feel were the historical purposes and goals of an institution. Many interpretations will be presented throughout the book enabling the reader to form an opinion about past events and think about future responses.

*The Great American Education-Industrial Complex* Anthony G. Picciano, Joel Spring, 2013-05-07 The Great American Education Industrial Complex examines the structure and nature of national networks and enterprises that seek to influence public education policy in accord with their own goals and objectives In the past twenty years significant changes have taken place in the way various

interest groups seek to influence policies and practices in public education in the United States No longer left to the experience and knowledge of educators American education has become as much the domain of private organizations corporate entities and political agents who see it as a market for their ideas technologies and ultimately profits Picciano and Spring posit that educational technology is the vehicle whereby these separate movements organizations and individuals have become integrated in a powerful common entity and detail how the educational industrial complex has grown and strengthened its position of influence This timely carefully documented well argued book brings together Picciano s perspective and expertise in the field of technology and policy issues and Spring s in the history and politics of education in a unique critical analysis of the education industrial complex and its implications for the future Chicana/o Struggles for Education Guadalupe San Miguel, 2013-06-03 Much of the history of Mexican American educational reform efforts has focused on campaigns to eliminate discrimination in public schools However as historian Guadalupe San Miguel demonstrates in *Chicana o Struggles for Education Activism in the Community* the story is much broader and more varied than that While activists certainly challenged discrimination they also worked for specific public school reforms and sought private schooling opportunities utilizing new patterns of contestation and advocacy In documenting and reviewing these additional strategies San Miguel s nuanced overview and analysis offers enhanced insight into the quest for equal educational opportunity to new generations of students San Miguel addresses questions such as what factors led to change in the 1960s and in later years who the individuals and organizations were that led the movements in this period and what motivated them to get involved and what strategies were pursued how they were chosen and how successful they were He argues that while Chicana o activists continued to challenge school segregation in the 1960s as earlier generations had they broadened their efforts to address new concerns such as school funding testing English only curricula the exclusion of undocumented immigrants and school closings They also advocated cultural pride and memory inclusion of the Mexican American community in school governance and opportunities to seek educational excellence in private religious nationalist and secular schools The profusion of strategies has not erased patterns of de facto segregation and unequal academic achievement San Miguel concludes but it has played a key role in expanding educational opportunities The actions he describes have expanded extended and diversified the historic struggle for Mexican American education American Education Joel H. Spring, 1998 Clear concise and authoritative *American Education* brings issues and challenging perspectives to teacher educators classrooms Revised every two years the text provides an up to date introduction to the historical political social and legal foundations of education and to the profession of teaching in the United States BOOK JACKET *The Evolution of Educational Theory in the United States* Dickson Mungazi, 1999-01-30 There is no better way to understand a society s assessment of its own success or failure than an examination of its theories of education because any attempt to improve national performance will be reflected in educational policy This study is a comprehensive account of the

evolution of American educational theory from the colonial period to the present. It includes a broad discussion of the foundations upon which early Americans built their educational policy as well as influential factors unique to the American experience. From the Revolution to nineteenth century reform efforts to the turbulent twentieth century educational theory has been adapted to suit the needs of an ever changing multicultural society. Throughout U.S. history key objectives have affected the character of education particularly curriculum. One main thrust for reform has been the belief that equality in education serves the national interest. Examination of the historical attitudes toward the education of African Americans provides a valuable insight into this process. Today America is experiencing significant difficulties in making its educational system succeed and the negative social effects of this deterioration are already apparent. The future success of educational theory lies in international cooperative efforts.
