Larson Common Core Algebra Pacing Guide:

Transform Your Math Class Using Asset-Based Teaching for Grades 6-12 Michael D. Steele, Joleigh Honey, 2024-07-19

Foster a love of mathematics by creating a more inclusive and empowering learning environment through asset based teaching. An asset based perspective on math education means starting with what students already know instead of focusing on what's missing. This approach elevates student thinking and reasoning skills. In this way, educators acknowledge that all students bring prior experiences, strengths, talents, and resources to the learning process and can contribute meaningfully in an authentic learning environment. *Transform Your Math Class Using Asset Based Teaching for Grades 6-12* provides insight into asset based perspectives in mathematics education to create an environment where all students feel valued and capable of being doers of mathematics. In the book, Michael Steele and Joleigh Honey highlight the importance of using language, instructional routines, and systemic structure that positively impact student engagement, their math identity, and ultimately their outcomes. Providing a wealth of knowledge and practical strategies that can be used to transform math classrooms into inclusive, supportive, and empowering learning environments, this book introduces an asset based perspective that focuses on students' strengths, assets, and potential to learn mathematics. Includes a variety of frameworks and tools that teachers can use to build and grow their sense of asset based perspectives. Offers strategies for promoting a growth mindset in mathematics, encouraging productive struggle in math, and promoting equitable math instruction. Supports teachers in reflecting on their decisions, self-awareness, and self-management. Includes a companion online study guide to support teachers individually or as part of a professional learning community. Adopting asset based perspectives is about movement over time, not about flipping a switch. This book paves the path for an asset based journey that ultimately helps to transform our math classrooms and advance all students' learning and development.

Mathematics and Multi-Ethnic Students Yvelyn Germain-McCarthy, 2017-05-25

Mathematics and Multi-Ethnic Students provides detailed profiles of teachers across the nation who have implemented effective mathematics instruction for diverse student populations. In this revised edition, Yvelyn Germain-McCarthy expands upon the popular case studies and adds two new chapters to highlight the latest educational research and practices that are reflected in the case studies. A third new chapter introduces the concept of the Life Long Learning Laboratory, where courageous questions on issues such as the impact of race on student learning are discussed. Featuring useful framing tools, including the Discussion with Colleagues and Commentary sections, *Mathematics and Multi-Ethnic Students* translates concrete instances of access and equity into generalized problem solving methods for promoting ethnic diversity across grade levels. An important resource for pre-service and in-service educators, researchers, administrators, and policy makers, this volume highlights the work of teachers who have gone beyond mere awareness of reform recommendations in mathematics instruction. By uniting the goals of multicultural education with those of the mathematics curriculum, educators will learn to conceptualize and implement best practices for effective equitable teaching.
