riveting real life Hitchhiker's Guide to the Galaxy The Telegraph and whirlwind tour of wondrous celestial phenomena The Idler shows why so much of astronomy comes down to looking up and looking out If you learn about the scientific method you learn that first we hypothesize about something we've experienced and then we look for more of it This works well enough but what if you are interested in studying a heretofore unknown comet or supernova That is the essential problem of the astronomer the most important discoveries happen without notice Indeed as Chris Lintott argues in *Accidental Astronomy* luck defines astronomy Lintott explores the ways in which happenstance shapes how we investigate the sky To catch a glimpse of a comet asteroid or even a sign of alien life we must be in the right place at the right time And if we can't be there we must have a team of professionals and amateurs across the globe ready to spring into action at a moment's or a night's notice For any astronomer regardless of their experience or resources the first step to discovery is the same to stare at the sky and wait A celebration of astronomy stargazing and cosmic discovery *Accidental Astronomy* offers an irresistible window into how luck defines our knowledge of the skies *Rise of the Self-Replicators* Tim Taylor, Alan Dorin, 2020-07-30 Is it
