The IMLI Treatise On Global Ocean Governance David Joseph Attard, Rosalie P Balkin, Donald W Greig, 2018-07-04. The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance. However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically. With seemingly no opportunity for revision due to the Convention's burdensome amendment provisions, complementary mechanisms dealing with such aspects of global ocean governance including maritime transport, fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations. This approach is inherently fragmented and unable to achieve sustainable global ocean governance. In light of the Sustainable Development Goals (SDGs) particularly Goal 14, the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans. The volume examines how the IMO with 171 Member States and 3 Associated Members has and continues to promote the goals of safe, secure, sound and efficient shipping on clean oceans. It studies the interface and interaction between UNCLOS and IMO instruments and how IMO's safety, security and environmental protection conventions have contributed to global ocean governance including the peaceful order of the polar regions.

Chijioke, 2016-08-05 About the Book Paucity of literature in the area of maritime law in Nigeria was what motivated the author to embark on this project and as such this book is the authors attempt to contribute to the bridging of the gap in knowledge in this area of the law This book is written in simple and understandable English to ensure fluidity of reading It is presented in such a way as to provide information in the areas of commercial law carriage of goods by sea maritime law as well as practical steps in maritime law litigation and related actions Particular consideration has been given to the study of carriage of dangerous goods by sea a subject which existing legal literature in Nigeria merely mentioned in passing Suffice it to say that this book is the first Nigerian legal literature that has explored that subject taking into consideration our domestic laws and international treaties most of which are yet to be ratified and domesticated in

Nigeria Though the work has Nigeria as its geographical location it has discussed the subject with comparative analysis of contemporary development in some areas of maritime law with special reference to the United Kingdom and the United States It is the authors belief that this book apart from providing practical guide to maritime litigation in Nigeria would also serve as veritable tool for teaching and studying of maritime law and related courses in Nigerian Universities and other territory institutions and would be immeasurably useful to legal practitioners members of the bench an research fellows Dr C O Chijioke Faculty of Law Abia State University Understanding New Security Threats Michel Gueldry,Gigi Gokcek,Lui Hebron,2019-02-21 This textbook examines non traditional forms of security and expands the notion of security to include non state actors and non human actors Proposing an expansive view of non traditional forms of security that go beyond traditionally recognized issues of threats to state and national territory this new textbook rests on the following premises traditional state centered threats such as nuclear proliferation and espionage remain a concern old and new threats combine and create interlocking puzzles a feature of wicked problems and wicked messes because of the global erosion of borders new developments of unconventional insecurity interact in ways that frustrate traditional conceptual definitions conceptual maps and national policies unconventional security challenges which have traditionally been seen as low politics or soft issues are now being recognized as hard security challenges in the twenty first century many of the so called new threats detailed here are in fact very old diseases gender violence food insecurity under development and crime are all traditional security threats but deeply modified today by globalization The chapters offer local and global examples and engage with various theoretical approaches to help readers see the bigger picture Solutions are also suggested to these problems Each chapter contains discussion questions to help readers understand the key points and facilitate class discussion This book will be of great interest to students of international security studies human security global politics and international relations
