Education Science ,2009-01-01 Educational research is not what it was fifteen years ago In this discipline the changes have been dramatic far reaching and rapid Out of the criticisms of the 1990s and the calls for greater accountability of the early 2000s one idea has come to the fore education

science There are two main components to education science The first is the principle that research in education must model itself more closely on disciplines seen as highly credible and successful mainly the natural sciences and medicine The second part is that educators must build their practice upon the insights developed through this scientific research process Overall education science has the potential to change how we think about education how we build knowledge about it and how we know when it is successful This volume brings together some of the most active proponents of education science and some of the most committed critics Within it the idea of education science is explored in depth randomized controlled trials considered the gold standard of education science are discussed in detail and the philosophical difficulties of knowledge in education are explored Established thinkers are brought alongside newly emerging analysts and detailed accounts of the institutions driving education science are included Each contribution is thoughtful and balanced engaging with the issues of the field and how they might be addressed As a body of work this collection of essays provides a well rounded critical discussion of the potential and the problems of the education science movement

The Core: Teaching Your Child the Foundations of Classical Education Leigh A. Bortins, 2010-06-08 In the past correct spelling the multiplication tables the names of the state capitals and the American presidents were basics that all children were taught in school Today many children graduate without this essential knowledge Most curricula today follow a haphazard sampling of topics with a focus on political correctness instead of teaching students how to study Leigh Bortins a leading figure in the homeschooling community is having none of it She believes that there are core areas of knowledge that are essential to master Without knowing the multiplication tables children can't advance to algebra Without mastery of grammar students will have difficulty expressing themselves Without these essential building blocks of knowledge students may remember information but they will never possess a broad and deep understanding of how the world works In The Core Bortins gives parents the tools and methodology to implement a rigorous thorough and broad curriculum based on the classical model including Rote memorization to cement knowledge Systematic learning of geography historical facts and timelines Reading the great books and seminal historical documents instead of adaptations and abridged editions Rigorous training in math and the natural sciences

Home Learning Year by Year Rebecca Rupp, 2009-02-04 Finally homeschoolers have a comprehensive guide to designing a homeschool curriculum from one of the country's foremost homeschooling experts Rebecca Rupp presents a structured plan to ensure that your children will learn what they need to know when they need to know it from preschool through high school Based on the traditional pre K through 12th grade structure Home Learning Year by Year features The integral subjects to be covered within each grade Standards for knowledge that should be acquired by your child at each level Recommended books to use as texts for every subject Guidelines for the importance of each topic which knowledge is essential and which is best for more expansive study based on your child's personal interests Suggestions for how to sensitively approach less academic subjects such as sex education and physical fitness

Learning XSLT Michael Fitzgerald, 2003-11-14 XSLT is a powerful language for transforming XML documents into something else That something else can be an HTML document another XML document a Portable Document Format PDF file a Scalable Vector Graphics SVG file a Virtual Reality Modeling Language VRML file Java code or a number of other things You write an XSLT stylesheet to define the rules for transforming an XML document and the XSLT processor does the work As useful as XSLT is its peculiar characteristics make it a difficult language in which to get started In fact newcomers are often a little dazed on first contact Learning XSLT offers a hands on introduction to help them get up to speed with XSLT quickly The book will help web developers and designers understand this powerful but often mystifying template driven and functional styled language getting them over the many differences between XSLT and the more conventional programming languages Learning XSLT moves smoothly from the simple to complex illustrating all aspects of XSLT 1.0 through step by step examples that you'll

practice as you work through the book Thorough in its coverage of the language the book makes few assumptions about what you may already know You ll learn about XSLT s template based syntax how XSLT templates work with each other and gain an understanding of XSLT variables Learning XSLT also explains how the XML Path Language XPath is used by XSLT and provides a glimpse of what the future holds for XSLT 2 0 and XPath 2 0 The ability to transform one XML vocabulary to another is fundamental to exploiting the power of XML Learning XSLT is a carefully paced example rich introduction to XSLT that will have you understanding and using XSLT on your own in no time **The Best of Corwin: Differentiated**

Instruction in Literacy, Math, and Science Leslie Laud,2011-09-28 Content specific DI guidance from the best minds in education In this collection current research on the most effective differentiation practices for differentiating instruction in literacy mathematics and science is brought alive through the many strategies and examples Topics covered include Reading and writing A comprehensive array of models for differentiating reading instruction gradual release of responsibility to accelerate progress and multi tiered writing instruction Mathematics Support for both low and high achieving students including interventions and challenges and the implementation of RTI in math instruction Science Models and methods for increasing student achievement through differentiated science inquiry **Betrayed** Laurie H.
