

Police Officer Biography Sample

Officer Patricia Stewart has been an accomplished member of the Wharton County Police force for the past twelve years. As a native to the Wharton County area, she was inspired from a young age to join in the force that served not only as the protective force of the community, but also helped the community through teamwork and service. Since she has been on the force, she has helped to bring forth much change in the community through her outreach work and her efforts to help older students understand the true mission of a police force. Through leadership and dedication, she continues to serve the entire Wharton County area.

Patricia graduated from Gardener High School with a certificate of completion in the Reserve Officer's Training Corps program at the school. She was the lead cadet in the ROTC program, and was awarded the Cadet Honor for completing over 1000 hours of community service throughout her time in the program. After graduating, she attended the police academy at Detrick Falls, where she completed all the necessary training and tests to become a police officer and investigator. She then chose to return to her home of Wharton County in order to continue serving the community that she had grown up in.

During her tenure as part of the Wharton County Police force, Patricia has participated in over 140 investigations, and has played an active role in gathering the evidence for several key cases. She has received the Award for Integrity for her handling of different volatile situations with the right amount of poise and authority to resolve issues without violence. Her contributions to the community through educational programs have also made a positive impact on the lives of many children throughout the county. She hopes to continue being able to serve the community through diligence and trustworthiness.

Law Enforcement Bio Example:

Persons, Parts and Property Imogen Goold, Kate Greasley, Jonathan Herring, Loane Skene, 2014-09-25 The debate over whether human bodies and their parts should be governed by the laws of property has accelerated with the pace of technological change Having long held that a corpse could not be property the common law first recognised that there could be a property interest in human tissue in some circumstances in the early 1900s but it was not until a string of judicial decisions and statutory regulation in the 1990s and early 2000s that the place of this exception was cemented The 2009 decision of the Court of Appeal of England and Wales in *Yearworth v North Bristol NHS Trust* added a new dimension to the debate by supporting a move towards a broader more principled basis for finding or rejecting property rights in human tissue However the law relating to property rights in human bodies and their parts remains highly contested The contributions in this volume represent a collation of the broad spectrum of analyses on offer and provide a detailed exploration of the salient legal and theoretical puzzles arising out of the body as property question *Modes of Bio-Bordering* Nina Amelung, Rafaela Granja, Helena Machado, 2020-10-30 This open access book explores how biometric data is increasingly flowing across borders in order to limit control and contain the mobility of selected people namely criminalized populations It introduces the concept of bio bordering using it to capture reverse patterns of bordering and ordering practices linked to transnational biometric data exchange regimes The concept is useful to reconstruct how the territorial foundations of national state autonomy are partially reclaimed and at the same time partially purposefully suspended The book focuses on the Pr m system which facilitates the mandatory exchange of forensic DNA data amongst EU Member States The Pr m system is an underexplored phenomenon representing diverse instances of bio bordering and providing a complex picture of the hidden dis integration of Europe Particular legal scientific technical and political dimensions related to the governance and uses of biometric technologies in Germany the Netherlands Poland Portugal and the United Kingdom are specifically explored to demonstrate both similar and distinct patterns **Intelligence, Biosecurity and Bioterrorism** Patrick F. Walsh, 2018-09-18 This book explores how potential bio threats and risks may evolve post 9 11 given the rapid changes in biotechnology and synthetic biology It also explores what role intelligence communities can play in understanding threats and risks It argues that although bio threats and risks are largely low probability and high impact in nature intelligence in Five Eyes countries remain insufficiently prepared to understand them This book identifies key areas where intelligence reforms need to take place including a more strategic and systematic collaboration between national security law enforcement intelligence and the scientific community It is aimed at intelligence analysts those in the scientific community working on health security threats policy makers and researchers working on biosecurity and bioterrorism threats and risks Protecting Personal Information Andrea Monti, Raymond Wacks, 2019-05-30 The concept of privacy has long been confused and incoherent The right to privacy has been applied

promiscuously to an alarmingly wide ranging assortment of issues including free speech political consent abortion contraception sexual preference noise discrimination and pornography The conventional definition of privacy and attempts to evolve a privacy as a fence approach are unable to deal effectively with the technological advances that have significantly altered the way information is collected stored and communicated Social media such as Facebook pose searching questions about the use and protection of personal information and reveal the limits of conceiving the right to privacy as synonymous with data protection The recent European Union's GDPR seeks to enforce greater protection of personal information but the overlap with privacy has further obscured its core meaning This book traces these troubling developments and seeks to reveal the essential nature of privacy and critically what privacy is not

Bio-Inspired Innovation and National Security

National Defense University, 2010-10 Despite the vital importance of the emerging area of biotechnology and its role in defense planning and policymaking no definitive book has been written on the topic for the defense policymaker the military student and the private sector bioscientist interested in the emerging opportunities market of national security This edited volume is intended to help close this gap and provide the necessary backdrop for thinking strategically about biology in defense planning and policymaking This volume is about applications of the biological sciences here called biologically inspired innovations to the military Rather than treating biology as a series of threats to be dealt with such innovations generally approach the biological sciences as a set of opportunities for the military to gain strategic advantage over adversaries These opportunities range from looking at everything from genes to brains from enhancing human performance to creating renewable energy from sensing the environment around us to harnessing its power

Health Security

Intelligence Michael S. Goodman, James M. Wilson, Filippa Lentzos, 2021-12-19 Health Security Intelligence introduces readers to the world of health security to threats like COVID 19 and to the many other incarnations of global health security threats and their implications for intelligence and national security Disease outbreaks like COVID 19 have not historically been considered a national security matter While disease outbreaks among troops have always been a concern it was the potential that arose in the first half of the twentieth century to systematically design biological weapons and to develop these at an industrial scale that initially drew the attention of security defence and intelligence communities to biology and medical science This book charts the evolution of public health and biosecurity threats from those early days tracing how perceptions of these threats have expanded from deliberately introduced disease outbreaks to also incorporate natural disease outbreaks the unintended consequences of research laboratory accidents and the convergence of emerging technologies This spectrum of threats has led to an expansion of the stakeholders tools and sources involved in intelligence gathering and threat assessments This edited volume is a landmark in efforts to develop a multidisciplinary empirically informed and policy relevant approach to intelligence academia engagement in global health security that serves both the intelligence community and scholars from a broad range of disciplines The chapters in this book were originally published as a special issue of the

journal Intelligence and National Security **Biotraffic** Christopher Morris, 2024-10-15 Biotraffic explores the complex world of biological resource trade It takes readers inside the contemporary Ciskei region of South Africa a once notorious apartheid homeland turned extractive hub for wild medicinal plants Drawing from in depth ethnographic and archival research Christopher Morris examines the region's trade in *Pelargonium sidoides* a plant once contested as a tuberculosis treatment in early twentieth century Europe and now an internationally marketed remedy for the common cold The story of this trade links past and present encapsulating a larger tale about colonial legacies and their intersection with global environmental governance ambitions It also teems with a diverse cast of actors from plant harvesters and pharmaceutical companies to activist NGOs and the chiefs who have become business partners with multinational drug firms The book's analysis extends beyond considering merely the extraction and commercialization of plant resources and offers a critical examination of how demand for therapeutics intertwines with broader struggles over land and political power in South Africa Biotraffic illuminates how a distance defying trade is reshaping the sociopolitical landscape of a region a region grappling with apartheid's afterlives and the challenges of environmental and economic justice **Handbook of Biosurveillance** Michael M. Wagner, Andrew W. Moore, Ron M. Aryel, 2011-04-28 Provides a coherent and comprehensive account of the theory and practice of real time human disease outbreak detection explicitly recognizing the revolution in practices of infection control and public health surveillance Reviews the current mathematical statistical and computer science systems for early detection of disease outbreaks Provides extensive coverage of existing surveillance data Discusses experimental methods for data measurement and evaluation Addresses engineering and practical implementation of effective early detection systems Includes real case studies **National Bio and Agro-Defense Facility**, 2008 **Bio-inspired Innovation and National Security**, **BioShield** United States. Congress. House. Select Committee on Homeland Security, 2004 *Protecting Genetic Privacy in Biobanking Through Data Protection Law* Dara Hallinan, 2021 Hallinan argues that the substantive framework presented by the GDPR offers an admirable base line level of protection for the range of genetic privacy rights engaged by biobanking **Terrorism and Weapons of Mass Destruction** Ian Bellamy, 2007-12-12 There is a widely held belief in the imminent probability of nuclear chemical or biological weapons of mass destruction being used by terrorists against civilian targets This edited volume critically assesses the suggestion that one safeguard against this possibility would be to strengthen existing international prohibitions against state level acquisition of such weapons A glimpse of the possible potential of terrorist use of weapons of mass destruction has been seen through the actions of the Tokyo Aum group and through the use of chlorine by insurgents in Iraq However the extent of the real threat posed is as yet unclear and safeguarding against it in developing countries will not be easy This book assembles specialists in each category of WMD in order to examine the potential of expanding the three classical arms control treaties in order to combat the threat posed by smaller terrorist groups and draws conclusions as to the strengths and weaknesses of this suggestion *The*

Remington Registry of Outstanding Professionals Remington Registry, 2011-04 *Biocomputing 2017* Russ B Altman, A Keith Dunker, Lawrence Hunter, Marylyn D Ritchie, Tiffany A Murray, Teri E Klein, 2016-11-23

The Pacific Symposium on Biocomputing PSB 2017 is an international multidisciplinary conference for the presentation and discussion of current research in the theory and application of computational methods in problems of biological significance. Presentations are rigorously peer reviewed and are published in an archival proceedings volume. PSB 2017 will be held on January 4-8, 2017 in Kohala Coast, Hawaii. Tutorials and workshops will be offered prior to the start of the conference. PSB 2017 will bring together top researchers from the US, the Asian Pacific nations, and around the world to exchange research results and address open issues in all aspects of computational biology. It is a forum for the presentation of work in databases, algorithms, interfaces, visualization, modeling, and other computational methods as applied to biological problems, with emphasis on applications in data-rich areas of molecular biology. The PSB has been designed to be responsive to the need for critical mass in sub-disciplines within biocomputing. For that reason, it is the only meeting whose sessions are defined dynamically each year in response to specific proposals. PSB sessions are organized by leaders of research in biocomputing's hot topics. In this way, the meeting provides an early forum for serious examination of emerging methods and approaches in this rapidly changing field.

The CDC Field Epidemiology Manual Sonja A. Rasmussen, Richard A. Goodman, 2018-11-20

A NEW AND ESSENTIAL RESOURCE FOR THE PRACTICE OF EPIDEMIOLOGY AND PUBLIC HEALTH. The CDC Field Epidemiology Manual is a definitive guide to investigating acute public health events on the ground and in real time. Assembled and written by experts from the Centers for Disease Control and Prevention as well as other leading public health agencies, it offers current and field-tested guidance for every stage of an outbreak investigation, from identification to intervention and other core considerations along the way. Modeled after Michael Gregg's seminal book *Field Epidemiology*, this CDC manual ushers investigators through the core elements of field work, including many of the challenges inherent to outbreaks: working with multiple state and federal agencies or multinational organizations; legal considerations; and effective utilization of an incident management approach. Additional coverage includes updated guidance for new tools in field investigations, including the latest technologies for data collection and incorporating data from geographic information systems (GIS). Tips for investigations in unique settings, including healthcare and community congregate sites. Advice for responding to different types of outbreaks, including acute enteric disease, suspected biologic or toxic agents, and outbreaks of violence, suicide, and other forms of injury. For the ever-changing public health landscape, the CDC Field Epidemiology Manual offers a new authoritative resource for effective outbreak response to acute and emerging threats. Oxford University Press will donate a portion of the proceeds from this book to the CDC Foundation, an independent nonprofit and the sole entity created by Congress to mobilize philanthropic and private sector resources to support the Centers for Disease Control and Prevention's critical health protection work.
