**Recovering Caribbean Nature** James A. Kushlan,Kirsten Hines,2024-10-29 The Caribbean is a global biodiversity hotspot half its resident bird species are found nowhere else yet a quarter are threatened with extinction. Nearly all its native amphibians and reptiles and thousands of plants also are endemic. Yet less than 1% of the landscape can be considered natural and apart from reserves most land is privately owned. Despite the challenges of such habitat fragmentation the Caribbean's distinctive fauna and flora can be preserved through planning and managing a connected network of sustainable naturalistic landscapes reserves parks and private gardens. This book uniquely provides both a theoretical background and practical applications to restoring nature within the tropical Caribbean. Packed with beautiful color photographs it offers unifying principles that can be applied across the tropics and synthesizes information on the Caribbean's environmental uniqueness and globally significant biodiversity. It also provides explicit guidance on establishing sustainable and more naturalistic landscapes from large public lands to private yards and gardens. The book is essential reading for academics and researchers studying the Caribbean environment resource management professionals and scientists and educators from nongovernmental organizations who provide programs and advocacy for conservation and regional sustainability. Moreover it highlights the importance of private lands and gardens where the greatest gains can be made and so offers a handbook for knowledgeable private landowners and their professional advisors.
