- Law of Definite Proportions
  - A chemical formula indicates the ratio of atoms of each element in the compound
  - This law states that in samples of an chemical compound, the masses of the elements are always in the same proportion.
- Law of Multiple Proportions
  - Multiple compounds can contain the same atoms in different proportions.
  - Keeping the mass of one atom in each compound constant, the ratio of remaining atom in each compound will be a small whole number.
