*The Drone Memos* Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens. Publishers Weekly starred review. In the long response to 9/11, the US government initiated a deeply controversial policy of targeted killing, the extrajudicial execution of suspected terrorists and militants typically via drones. A remarkable effort was made to legitimize this practice, one that most human rights experts agree is illegal and that the United States has historically condemned. In *The Drone Memos*, civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action. In a lucid and provocative introduction, Jaffer—who led the ACLU legal team that secured the release of many of the documents—evaluates the drone memos in light of domestic and international law. He connects the documents' legal abstractions to the real-world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security. A careful study of a secretive counterterrorism infrastructure capable of sustaining endless, orderless war, this book is profoundly necessary.

Katrina vanden Heuvel, editor and publisher of *The Nation*.

*Red, White, and Black* Robert L. Woodson, Sr., 2021-05-11 In the rush to redefine the place of black Americans in contemporary society, many radical activists and academics have mounted a campaign to destroy traditional American history and replace it with a politicized version that few would recognize. According to the new radical orthodoxy, the United States was founded as a racist nation, and everything that has happened throughout our history must be viewed through the lens of the systemic oppression of black people. Rejecting this false narrative, a collection of the most prominent and respected black scholars and thinkers has come together to correct the record and tell the true story of black Americans in all its complexity, diversity of experience, and poignancy. Collectively, they paint a vivid picture of black people living the grand American experience, however bumpy the road may be along the way. But rather than a people apart, blacks are woven into the united whole that makes this nation unique in history. Featuring essays by John Sibley Butler, Jason D. Hill, Coleman Cruz, Hughes John McWhorter, Clarence Page, Wilfred Reilly, Shelby Steele, Carol M. Swain, Dean Nelson, Charles Love, Rev. Corey Brook, Stephen L. Harris, Harold A. Black, Stephanie Deutsch, Yaya J. Fanusie, Ian Rowe, John Wood Jr., Joshua Mitchell, Robert Cherry, Rev. DeForest Black, Soaries Jr.

Fricker,Carlos Colon,2015-12-24 The Drone Debate offers a thorough investigation of the where why how and when of the U S s use of UAVs Beginning with a historical overview of the use of drones in warfare it then addresses whether targeted killing operations are strategically wise whether they are permissible under international law and the related ethical issues It also looks at the political factors behind the use of drones including domestic and global attitudes toward their use and potential issues of proliferation and escalation Finally the use of drones by other countries such as Israel and China is examined Each chapter features a case study that highlights particular incidents and patterns of operation in specific regions including Yemen

Somalia Pakistan and Libya and strike types signature strikes personality strikes etc

**Economic Aspects of Genocides, Other Mass Atrocities, and Their Prevention** Charles H.

Anderton, Jürgen Brauer, 2016-05-09 Alongside other types of mass atrocities, genocide has received extensive scholarly, policy, and practitioner attention. Missing, however, is the contribution of economists to better understand and prevent such crimes. This edited collection by 41 accomplished scholars examines economic aspects of genocides, other mass atrocities, and their prevention. Chapters include numerous case studies, e.g., California's Yana people, Australia's Aborigines, Stalin's killing of Ukrainians, Belarus, the Holocaust, Rwanda, DR Congo, Indonesia, Pakistan, Colombia, Mexico's drug wars, and the targeting of suspects during the Vietnam War, probing literature reviews, and completely novel work based on extraordinary country-specific datasets. Also included are chapters on the demographic, gendered, and economic class nature of genocide. Replete with research and policy-relevant findings, new insights are derived from behavioral economics, law, and economics, political economy, macroeconomic modeling, microeconomics, development economics, industrial organization, identity economics, and other fields. Analytical approaches include constrained optimization theory, game theory, and sophisticated statistical work in data mining, econometrics, and forecasting. A foremost finding of the book concerns atrocity architects' purposeful strategic use of violence, often manipulating nonrational proclivities among ordinary people to sway their participation in mass murder. Relatively understudied in the literature, the book also analyzes the options of victims before, during, and after mass violence. Further, the book shows how well-intended prevention efforts can backfire and increase violence, how wrong post-genocide design can entrench vested interests to reinforce exclusion of vulnerable peoples, and how businesses can become complicit in genocide. In addition to the necessity of healthy opportunities in employment, education, and key sectors in prevention work, the book shows why new genocide prevention laws and institutions must be based on reformulated incentives that consider insights from law, economics, behavioral economics, and collective action economics.

*Law and Regulation of Mobile Payment Systems* Joy Malala, 2017-11-28 Over the last ten years, mobile payment systems have revolutionized banking in some countries in Africa. In Kenya, the introduction of M-Pesa, a new financial services model,

has transformed the banking and financial services industry Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts This book addresses the legal and regulatory issues arising out of the introduction of M Pesa in Kenya and its drive towards financial inclusion It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya
