The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America's oldest public schools Property (\$T\$) for Groups Graded by Root Systems Mikhail Ershov, Andrei Jaikin-Zapirain, Martin Kassabov, 2017-09-25 The authors introduce and study the class of groups graded by root systems They prove that if G is an irreducible classical root system of rank n and H is a group graded by G then under certain natural conditions on the grading the union of the root subgroups is a Kazhdan subset of G As the main application of this theorem the authors prove that for any reduced irreducible classical root system of rank n and a finitely generated commutative ring with the Steinberg group and the elementary Chevalley group have property (P_n) They also show that there exists a group with property (P_n) which maps onto all finite simple groups of Lie type and rank n thereby providing a unified proof of expansion in these groups **After the Education Wars** Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of Reign of Error and The Death and Life of the Great American School System A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the

market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well. These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up. Lessons also learned from both the open source software and quality movements. The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life. A welcome exception to the doom and gloom canon of education reform. After the Education Wars makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools. **Kids Count New Jersey ...**, 2016 Artificial Intelligence and Symbolic Computation Gonzalo A.

Aranda-Corral, Jacques Calmet, Francisco J. Martín-Mateos, 2014-12-08 This book constitutes the refereed proceedings of the 12th International Conference on Artificial Intelligence and Symbolic Computation AISC 2014 held in Seville Spain in December 2014. The 15 full papers presented together with 2 invited papers were carefully reviewed and selected from 22 submissions. The goals were on one side to bind mathematical domains such as algebraic topology or algebraic geometry to AI but also to link AI to domains outside pure algorithmic computing. The papers address all current aspects in the area of symbolic computing and AI basic concepts of computability and new Turing machines logics including non classical ones reasoning learning decision support systems and machine intelligence and epistemology and philosophy of symbolic mathematical computing. **No Longer Newsworthy** Christopher R. Martin, 2019-05-15 Until the recent political shift pushed workers back into the media spotlight the mainstream media had largely ignored this significant part of American society in favor of the moneyed upscale consumer for more than four decades. Christopher R Martin now reveals why and how the media lost sight of the American working class and the effects of it doing so. The damning indictment of the mainstream media that flows through No Longer Newsworthy is a wakeup call about the critical role of the media in telling news stories about labor unions workers and working class readers. As Martin charts the decline of labor reporting from the late 1960s onwards he reveals the shift in news coverage as the mainstream media abandoned labor in favor of consumer and business interests. When newspapers especially wrote off working class readers as useless for their business model the American worker became invisible. In No Longer Newsworthy Martin covers this shift in focus the loss of political voice for the working class and the emergence of a more conservative media in the form of Christian television talk radio Fox News and conservative websites. Now with our fractured society and news media Martin offers the mainstream media recommendations for how to push back against right wing media and once again embrace the working class as critical to its audience and its democratic function. Topologically Protected States in One-Dimensional Systems Charles Fefferman,James P. Lee-Thorp,M. I. Weinstein,2017-04-25 The authors study a class of periodic Schrodinger operators which in distinguished cases can be proved to have linear band crossings or Dirac points They then show that the introduction of an edge via adiabatic modulation of these periodic potentials by a domain wall results in the bifurcation of spatially localized edge states These bound states are associated with the topologically protected zero energy mode of an asymptotic one dimensional Dirac operator The authors model captures many aspects of the phenomenon of topologically protected edge states for two dimensional bulk structures such as the honeycomb structure of graphene The states the authors construct can be realized as highly robust TM electromagnetic modes for a class of photonic waveguides with a phase defect *Family*

Engagement in Black Students' Academic Success Vilma Seeberg, 2021-03-15 This timely volume presents powerful stories told by Black families and students who have successfully negotiated a racially fraught affluent and diverse suburban school district in America to illustrate how they have strategically contested sanctioned racist practices and forged a path for students to achieve a high quality education Drawing on rich qualitative data collected through interviews and interactions with parents and kin students community activists and educators Family Engagement in Black Students Academic Success chronicles how pride in Black American family history and values students personal capabilities and their often collective proactive challenges to systemic and personal racism shape students academic engagement Familial and collective cultural wealth of the Black community emerges as a central driver in students successful achievement Finally the text puts forward key recommendations to demonstrate how incorporating the knowledge and voices of Black families in school decision making remaining critically conscious of race and racial history in everyday actions and longer term policy and pursuing collective strategies for social justice in education will help eliminate current opportunity gaps and will counteract the master narrative of underachievement ever present in America This volume will be of interest to students scholars and academics with an interest in matters of social justice equity and equality of opportunity in education for Black Americans In addition the text offers key insights for school authorities in building effective working relationships with Black American families to support the high achievement of Black students in K 12 education

Child Development at the Intersection of Race and SES, 2019-07-10 Child Development at the intersection of Race and SES Volume 57 in the Advances in Child Development and Behavior series presents theoretical and empirical scholarship illuminating how race ethnicity and socioeconomic status intersect to shape children s development and developmental

contexts Important chapters in this new release include the Implications of Intersecting Socioeconomic and Racial Identities for Academic Achievement and Well being The home environment of low income Latino children Challenges and opportunities Profiles of race ethnicity and socioeconomic status Implications for ethnic racial identity discrimination and sleep Youths sociopolitical perceptions and mental health Intersections between race class and gender and much more Rather than focusing on the additive effects of race ethnicity and SES which is typical and a limitation in the developmental literature the scholarship in this book considers how the factors and processes shaping the development of children of color can differ markedly across the socioeconomic continuum This collection illustrates how applying an intersectional lens to developmental science can yield unique insights into the challenges confronting and assets buoying both minority and majority children s healthy development Includes contributions from renowned developmental scholars working at the forefront of their fields Presents a multidisciplinary focus that will be useful to developmental psychologists sociologists family scientists and those whose interests and work fall under the purview of those disciplines Examines multiple dimensions and factors shaping childhood development *Competency-Based Education* Rose L. Colby,2019-01-02 Competency Based Education introduces educators to a new model for anytime anywhere schooling and provides tools and curriculum resources for redesigning the traditional structures of K 12 schools Based on pioneering work across multiple states the book shows how educators can design central elements of competency based education including performance tasks personal learning plans and grading systems to meet the needs and interests of all students Rose L Colby provides critical tools for creating these elements in collaborative teams and engaging stakeholders such as educators parents and community members The book incorporates case studies and voices from the field and examines the variety of competency models that schools have adopted highlighting the benefits for students Competency Based Education provides a much needed resource at a time when states districts and schools are working to implement competency based models and experimenting with new accountability systems that include evidence of learning beyond standardized tests *The Vanishing Middle Class* Peter Temin,2017-03-17 Why the United States has developed an economy divided between rich and poor and how racism helped bring this about The United States is becoming a nation of rich and poor with few families in the middle In this book MIT economist Peter Temin offers an illuminating way to look at the vanishing middle class Temin argues that American history and politics particularly slavery and its aftermath play an important part in the widening gap between rich and poor Temin employs a well known simple model of a dual economy to examine the dynamics of the rich poor divide in America and outlines ways to work toward greater equality so that America will no longer have one economy for the rich and one for the poor Many poorer Americans live in conditions resembling those of a developing country substandard education dilapidated housing and few stable employment opportunities And although almost half of black Americans are poor most poor people are not black Conservative white politicians still appeal to the racism of poor white voters to get

support for policies that harm low income people as a whole casting recipients of social programs as the Other black Latino not like us Politicians also use mass incarceration as a tool to keep black and Latino Americans from participating fully in society Money goes to a vast entrenched prison system rather than to education In the dual justice system the rich pay fines and the poor go to jail **National Journal** ,2007 The Budget of the United States Government United States.
