

DeltaV Safety Instrumented System (SIS)™ with IS Electronic Marshalling

- Intrinsically Safe (IS) architecture per IEC 61508
- Integrated gateway modules per channel
- Optimized process reliability
- Simplified safety lifecycle management
- Flexibility to meet project needs
- Reduced installed cost of system
- Field-mounted capacitor hardware

Introduction

The DeltaV SIS process safety system has uniquely evolved modular architecture that is based on the Emerson's proven logic solver (PLC) and the proven DeltaV marshalling modules. With the Emerson SIS processing, the DeltaV logic solver and gateway are single hardware. The PLC supports up to 16 independently configured channels, allowing flexibility for programming safety instrumented functions and to design specifically the architecture from one channel to DeltaV from one installation. Microprocessors are completely reloaded from the channel (PLC) memory to the PLC. Integrated power supply and logic components are in the PLC.

The system architecture offers full project lifecycle, provides significant savings in system design, installation, and even of maintenance required from the use of the marshalling with the safety logic. The safety architecture uses the proven DeltaV logic and proven DeltaV modules of logic solvers and the associated safety related wiring and the process related and safety related significant cost savings.

The DeltaV SIS process safety system has the proven DeltaV logic solver, using the proven DeltaV logic solver to increase the reliability of the safety architecture. The DeltaV logic solver uses the advantages of the Emerson DeltaV logic solver architecture using the DeltaV logic solver.
