Metals in Water Sushil Kumar Shukla, Sunil Kumar, Sughosh Madhav, Pradeep Kumar Mishra, 2022-11-19 Metals in Water Global Sources Significance and Treatment covers metal pollution in water where they come from their effects and remediation processes Sections overview heavy metals pollution including their global health impacts and remediation measures Geogenic and anthropogenic input of heavy metals in water are described along with global case studies step by step methods on remediation techniques different detection sensors and assessment practices of toxicity of heavy metals The book focuses on recent research surrounding heavy metals contamination in water resources and its impact across the globe Chapters incorporate both theoretical and practical aspects and serve as baseline information for water resources studies This book is useful for postgraduate students teachers and researchers working in areas of water resources and pollution hydrochemistry environmental remediation and toxicology who are looking to understand the affects metals have on water the environment and health and also those looking for methods for remediation Presents global case studies of sites

contaminated by metals effects on the environment and successful remediation techniques Includes a whole section on remedial measures with clear step by step how to guides Provides chapters covering detailed biogeochemical processes

Membrane Technologies for Water Treatment Alberto Figoli, Jan Hoinkis, Jochen Bundschuh, 2016-02-18 Focuses on the application of membrane technologies in removing toxic metals metalloids from water Particular attention is devoted to the removal of arsenic uranium and fluoride These compounds are all existing in the earth's crust at levels between two and five thousands micrograms per kg parts per million on average and these compounds can be considered highly toxic to humans who are exposed to them primarily from air food and water In order to comply with the new maximum contaminant level numerous studies have been undertaken to improve established treatments or to develop novel treatment technologies for removing toxic metals from contaminated surface and groundwater Among the technologies available applicable for water treatment membrane technology has been identified as a promising technology to remove such toxic metals from water The book describes both pressure driven traditional processes such as Nanofiltration Reverse Osmosis Ultrafiltration etc and more advanced membrane processes such as forward osmosis membrane distillation and membrane bio reactors employed in the application of interest Key aspect of this book is to provide information on both the basics of membrane technologies and on the results depending on the type of technology employed

Geospatial Analytics for Environmental Pollution Modeling Fayma Mushtaq, Majid Farooq, Alok Bhushan Mukherjee, Mili Ghosh Nee Lala, 2023-12-01 This book aims to provide a comprehensive study on various aspects of environmental pollution dynamics using geospatial technology and modeling techniques The utility of geospatial technology will be demonstrated for the effective study of environmental pollution as space and location are very important for effective environmental health surveillance The timeliness of the work is due to the increasing relevance of geospatial technology applications in environmental health investigations Moreover different types of pollution are covered in detail including air and soil all of which are analyzed using latest Remote Sensing and GIS technology The basics of environmental pollution and its impacts are covered in the book's first part while the second part focuses on the use of geospatial technology in investigating and modeling various instances of environmental pollution The third part discusses policy measures for mitigating environmental pollution hazards using geospatial analyses and data to craft informed policy decisions The primary audience for the book is researchers working in the field of environmental pollution with incorporation of geospatial technology including upper level undergraduate and graduate students taking courses in remote sensing and its environmental applications The secondary audience is academicians planners environmentalists and policymakers working in the field of environment protection and management

Modeling and Simulation of Environmental Systems Satya Prakash Maurya, Akhilesh Kumar Yadav, Ramesh Singh, 2022-08-24 This book presents an overview of modeling and simulation of environmental systems via diverse research problems and pertinent case studies It is divided into four parts covering sustainable water resources modeling air pollution modeling Internet of Things

IoT based applications in environmental systems and future algorithms and conceptual frameworks in environmental systems Each of the chapters demonstrate how the models indicators and ecological processes could be applied directly in the environmental sub disciplines It includes range of concepts and case studies focusing on a holistic management approach at the global level for environmental practitioners Features Covers computational approaches as applied to problems of air and water pollution domain Delivers generic methods of modeling with spatio temporal analyses using soft computation and programming paradigms Includes theoretical aspects of environmental processes with their complexity and programmable mathematical approaches Adopts a realistic approach involving formulas algorithms and techniques to establish mathematical models computations Provides a pathway for real time implementation of complex modeling problem formulations including case studies This book is aimed at researchers professionals and graduate students in Environmental Engineering Computational Engineering Computer Science Modeling Simulation Environmental Management Environmental Modeling and Operations Research *Geology and Natural Resources of Nigeria* Silas S. Dada, Samuel B. Olobaniyi, Kamaldeen O.L Omosanya, 2024-07-16 *Geology and Natural Resources of Nigeria* is an up to date and comprehensive overview of the geological framework of the continental crust of Nigeria its evolution and the natural resources it holds It covers a wide set of topics and provides a detailed description of the rock units of the Nigerian continental crust their geological settings and structural characteristics and the potential of their mineral energy and water resources The book discusses the impact of geo resources on the Nigerian economy includes recommendations on how to fully exploit geo resources and explains how to prevent geological processes that could lead to natural hazards FEATURES Provides different aspects of the Nigerian continental crust from a multidisciplinary approach Draws on the latest findings in geoscience research to present new insights and perspectives into the development and resource potential of the Nigerian continental crust Includes multiple case studies to illustrate the exploration and evaluation of the geological resources of Nigeria Explores the potential of geological resources for economic and industrial development Presents scientific achievements of authors and researchers from various disciplines and provides recommendations for mitigating natural hazards This handbook is intended for industry professionals academics researchers and students studying earth sciences with a special interest in Africa and learning how its geology impacts the natural resources and overall economy of the continent
