Cultural Awareness - :Self-examination of one's own prejudices and biases toward other cultures. An in-depth exploration of one's own cultural/ethnic background.

Cultural competence in nursing consists of four principles. - Care is designed for the specific client.

Care is based on the uniqueness of the person's culture and includes cultural norms and values.

Care includes self-employment strategies to facilitate client decision making to improve health behaviors.

Care is provided with sensitivity and is based on the cultural uniqueness of clients.

The APN may also use the Kleinman Explanatory Model of illness (1978). Below are the questions that can be utilized. - What do you call your problem?

What do you think caused your problem?

Why do you think it started when it did?

What does your sickness do to you?

What do you fear most about your sickness?

What are the chief problems your sickness has caused you?

What kind of treatment do you think you should receive?

What is the most important result you hope to receive from the treatment?

According to Giger and Davidhizer (2000), although cultures differ, they all have the same basic organizing factors that must be assessed in order to provide care for culturally diverse patients. These factors include - communication (verbal and nonverbal);

personal space;

social organization;

time perception;

environmental control; and

biological variations.

The NCCC uses four major approaches to fulfill its mission, including - Web-based technical assistance, (2) knowledge development and dissemination, (3) supporting a community of learners, and (4) collaboration and partnerships with diverse groups.

Epidemiological Triad: - host, agent, environment

Genetics - The study of individual genes and their impact on relatively rare single gene disorders
