While the detection performance of HI-SCAN 6040aTiX is far superior to that of other automatic systems, the rate of false alarms has been considerably reduced through the use of optimized algorithms.

Using advanced computer technologies, even complex analyses will be carried out in real-time without hampering usual checkpoint measures.

The operating concept of the proven HI-SCAN series has been retained which guarantees an optimum passenger throughput at checkpoints.

The two detailed views (Dual View) available to carry out manual analysis support the quick and reliable evaluation process.

Another option is iCMORE Weapons for the automatic detection of pistols, revolvers, gun parts, flick and fixed blade knives. Developed using AI, it is part of the iCMORE family of smart and adaptable object recognition algorithms.
