Protection and Repair of Concrete Structures FIB – International Federation for Structural Concrete, 2022-03-01 The idea of
preparing a technical document for the repairs and interventions upon concrete structures goes back to the former fib COM5
Structural Service Life Aspects being the goal of the then TG5 9 After a long period of reduced activity and taking into
account the reorganization of fib commissions that meanwhile took place on June 2017 a different approach was proposed to
push forward the task of TG8 1 formerly TG5 9 The new goal of TG 8 1 was to deliver a how to do guide gathering together
protection repair and strengthening techniques for concrete structures Chapters are intended to provide both guidelines and
case studies serving as support to the application of fib MC2020 pre normative specifications Each chapter was written by an
editorial team comprising desirably at least a researcher a designer and a contractor Templates have been prepared in order
to harmonize the contents and the presentation of the different methods Following the writing process chapters were
reviewed by experts and after amendments by the authors they underwent a second review process by COM8 and TG3 4
members as well as by different practitioners For each protection repair and strengthening method addressed in this guide
readers have a description of when to adopt it which materials and systems are required which techniques are available and
what kind of equipment is needed It then presents a summary of stakeholders roles and qualifications design guidelines
referring to most relevant codes and references the intervention procedure quality control measures and monitoring and
maintenance activities Due to the extent of the guide it was decided to publish it as bulletin 102 addressing protection and
repair methods and bulletin 103 addressing strengthening methods We would like to thank the authors reviewers and
members of COM8 and TG3 4 for their work in developing this fib Bulletin which we hope will be useful for professionals
working in the field of existing concrete structures especially those concerned with life cycle management and conservation
activities As noted above this Bulletin is also intended to act as a background and supporting document to the next edition of
the fib Model Code for Concrete Structures which is currently under development under the auspices of TG10 1 with the
working title of fib Model Code 2020 **Subject Guide to Books in Print** ,2001 **Catalog of Copyright Entries. Third**
