Coello-Coello,Julie Greensmith,Natalio Krasnogor,Pietro Liò, Giuseppe Nicosia,Mario Pavone,2012-08-27 This book constitutes the refereed proceedings of the 11th International Conference on Artificial Immune Systems ICARIS 2012 held in Taormina Italy in August 2012 The 19 revised selected papers presented were carefully reviewed and selected for inclusion in this book In addition 4 papers of the workshop on bio and immune inspired algorithms and models for multi level complex systems are included in this volume Artificial immune systems AIS is a diverse and maturing area of research that bridges the disciplines of immunology biology medical science computer science physics mathematics and engineering The scope of AIS ranges from modelling and simulation of the immune system through to immune inspired algorithms and in silico in vitro and in vivo solutions
