In Knives We Trust Geoff Brookes, 2018-10-16 An atmospheric murder mystery set in Victorian Swansea in 1880 Evokes a convincing portrayal of life in a nineteenth century Welsh town A plot which uses authentic locations and voices The first in a series featuring Inspector Rumsey Bucke Inspector Rumsey Bucke a still grieving widower must find Daniel Guy who has tried and failed to murder his own wife He tracks him steadily through the murky streets of Swansea's poorest communities with little help from a corrupt and incompetent police force Two fatal stabbings which may or may not be connected put Bucke's position under threat from a scheming superior However he finds the will and the support to change his life from an unlikely source the wife of a prime murder suspect As he finally confronts his own sorrow he discovers that terrible secrets lurk beneath the surface of the ordinary lives around him No one can ever escape from the secret burdens they carry with them But there are unknown figures lurking in the shadows and Bucke is drawn into the dangerous world of international politics with assassins playing out a clandestine war on the streets of the town ready to kill the innocent to protect themselves As he desperately runs out of time to prevent another murder Bucke has to find the answers which have eluded him Who is the murderer Is it Daniel Guy Is it someone else Just how many murderers are there There is a bigger question for him too If as they say justice is blind are there occasions when the law should be

blind too *In AI We Trust* Helga Nowotny, 2021-08-19 One of the most persistent concerns about the future is whether it will be dominated by the predictive algorithms of AI and if so what this will mean for our behaviour for our institutions and for what it means to be human AI changes our experience of time and the future and challenges our identities yet we are blinded by its efficiency and fail to understand how it affects us At the heart of our trust in AI lies a paradox we leverage AI to increase our control over the future and uncertainty while at the same time the performativity of AI the power it has to make us act in the ways it predicts reduces our agency over the future This happens when we forget that that we humans have created the digital technologies to which we attribute agency These developments also challenge the narrative of progress which played such a central role in modernity and is based on the hubris of total control We are now moving into an era where this control is limited as AI monitors our actions posing the threat of surveillance but also offering the opportunity to reappropriate control and transform it into care As we try to adjust to a world in which algorithms robots and avatars play an ever increasing role we need to understand better the limitations of AI and how their predictions affect our agency while at the same time having the courage to embrace the uncertainty of the future *In War We Trust* Chris J. Dolan, 2018-01-18

There is a long standing tradition in Western culture of differentiating between just and unjust wars 11 September 2001 has stimulated a debate in the West which holds that although people who are opposed to war in principle may disagree that any such distinction can possibly be made the basic ideas involved seem to present a plausible argument that there are times when war is at the very least just and politically necessary These and other issues are addressed in this study The consistent theme throughout this book is that significant ethical issues and moral dilemmas have been raised as they pertain to the forceful expression of American power via the Bush Doctrine s assertion of the right to engage in first strikes against states and non states in the wake of the 11 September 2001 terrorist attacks This book is intended for those with an interest in political science history leadership studies and foreign policy analysis **In Data We Trust** Lars Luck, Bjorn Bloching, Thomas Ramge, 2012-08-02

In God We Trust Beaulena C. Dunn,2016-06-03 A war is brewing between good and evil in the heavens and upon the earth a war that could destroy the very fabric of the universe As the underworld amasses its power and warriors of heaven prepare their weapons the clock ticks towards doom The fate of all rests with Alogar a gentle little entity incarnated as an earth born child to prevent the collapse of both realms Set in the anxious days of the Cuban Missile Crisis In God We Trust questions the nature of free will destiny and the immorality that comes with the wielding of immense power All that has been and will be was pre destined until now Will Alogar be able to return the world to its pre ordained path Or will the forces of evil prevent the entity from fulfilling its own destiny
