INSTALLATION NOTES:

As you can see from the diagram above, the P-Set consists of two pickups. Both pickups are identical in size and shape. Either can be used for the 57A strings or the 57B strings. The only difference between them is the connector on the bottom of the pickup. All EMG-HZ Pickups are compatible with each other. The connector system is an easy method of installation, avoiding the need to solder. EMG Accessory Circuits like the WUPP, ERS, BTC or BDC Controls can be added to any EMG Pickup System, all have buffered inputs and can be used on either passive or active pickups. The 0157 Bass included with the set will be used on instruments that use a selection switch.

IMPORTANT NOTE:

It is common practice to ground (earth) the strings of an instrument that uses passive pickups to reduce noise. This means there will be a wire coming from the bridge into the control cavity that will be hooked to one of the pots. Included with the EMG-HZ System is a single black wire with a connector on it and an IDC connector that will attach to the existing ground wire and will provide the ground (earth) connection.

INCLUDED WITH EACH PICKUP:

- 1 Volume Control (500K)
- 1 Tone Control (500K)

WARRANTY

All EMG Pickups and accessories are warranted for a period of two years. This warranty does not cover failure due to improper installation, abuse or damage. If upon examination the pickup is determined to be defective, a replacement will be made. Warranty replacement products are covered by the same warranty. This warranty covers only those pickups and accessories sold by authorized EMG Dealers. This warranty is not transferable.
