

Option 1—Work Independently

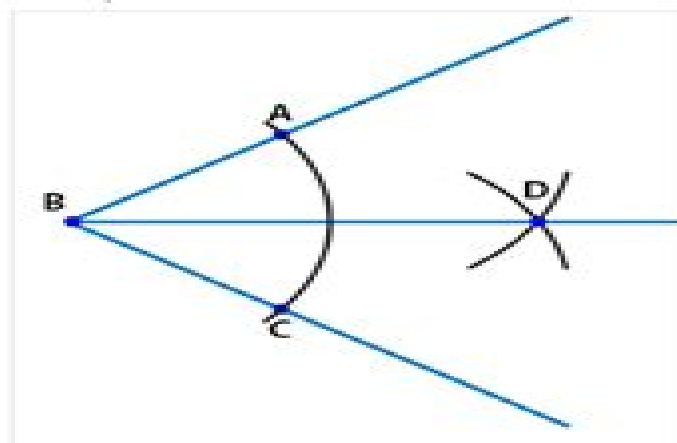

Throughout this module, you've learned about the basics of geometry and how to make constructions using a compass, a straightedge, and technology. It's time to put it all together! You will use what you have learned to tackle questions about constructions.

Step 1: Evaluate

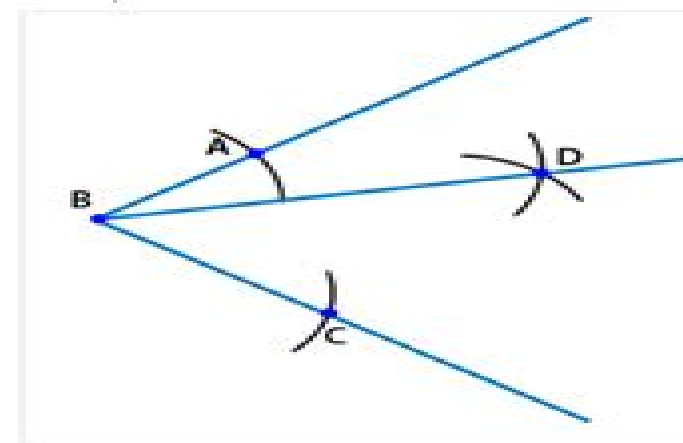

Answer the following questions:

1. Examine the two angle bisector constructions.

Example 1

Example 2

Which angle bisector was created by following the construction steps correctly? How do you know?

Example 1 was constructed properly. I know this because it follows the proper steps to bisecting an angle. Each bisected piece looks congruent.

Which angle bisector was constructed incorrectly? Explain the step that was completed incorrectly.

Example 2 was constructed incorrectly. You must swing the arc so it intersects both rays when you set the compass on the angle vertex. The arc didn't intersect.

2. Two students created a list of steps for the following construction. Which student has steps in the correct order, and which does not? Explain.

The second student has the proper steps. Student A messed up at the "Draw a line through point C and point G" step, but point G isn't created at that point. So student B is right.
