Michael Gard,Carolyn Pluim,2014-06-18 Schools and Public Health is a meditation on the past present and future of the
relationship between public health and American public schools Gard and Pluim begin by developing a historical account of
the way schools have been used in the public health policy arena in America They then look in detail at more contemporary
examples of school based public health policies and initiatives in order to come to a judgment about whether and to what
extent it makes sense to use schools in this way With this is as the foundation the book then offers answers to the question of
why schools have so readily been drawn into public health policy formulations First seeing schools as a kind of miracle
factory is a long standing habit of mind that discourages careful consideration of alternative public health strategies Second
schools have been implicated in public health policy in strategic ways by actors often with unstated political cultural
ideological and financial motivations Finally the authors call for a more sophisticated approach to public health policy in
schools and suggest some criteria for judging the potential efficacy of school based interventions In short the potential
effectiveness of proposed interventions needs to be assessed not only against existing historical evidence but also against the
competing roles society expects schools to play and the working life realities for those charged with implementing public
health policies in schools **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1976
