Grading Rubrics For Cooking Skills:

Job Skills and Minority Youth Barton J. Hirsch, 2015-11-19 Minority youth unemployment is an enduring economic and social concern. This book evaluates two new initiatives for minority high school students that seek to cultivate marketable job skills. The first is an after school program that provides experiences similar to apprenticeships and the second emphasizes new approaches to improving job interview performance. The evaluation research has several distinct strengths. It involves a randomized controlled trial uncommon in assessments of this issue and age group. Marketable job skills are assessed through a mock job interview developed for this research and administered by experienced human resource professionals. Mixed methods are utilized with qualitative data shedding light on what actually happens inside the programs and a developmental science approach situating the findings in terms of adolescent development. Beneficial for policy makers and practitioners as well as scholars. **Job Skills and Minority Youth** focuses on identifying the most promising tactics and addressing likely implementation issues.

Grading for Equity Joe Feldman, 2018-09-25 Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. This must have book will help teachers learn to implement improved equity focused grading for impact. Zaretta Hammond, Author of *Culturally Responsive Teaching: The Brain Crack* opens the grading conversation. Here at last and none too soon is a resource that delivers the research base tools and courage to tackle one of the most challenging and emotionally charged conversations in today's schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With *Grading for Equity*, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates. *Grading for Equity* provides a critical historical backdrop describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity, control students, and endorse a fixed mindset about students' academic potential. Practices that are still in place a century later. A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a true north orientation toward equitable grading practices. Specific grading practices that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness. Reflection tools for facilitating individual or group engagement and understanding. As Joe writes, "Grading practices are a mirror not just for students but for us as their teachers. Each one of us should start by asking, 'What do my grading practices say about who I am and what I believe?' Then let's make the choice to do things differently with *Grading for Equity* as a dog-eared reference."
