LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your lizards?

My criteria were: size, color, and shape of the lizards.

Did your lizards grow different than I did?

Yes, because the lizards that I selected were different in size, color, and shape. I also noticed that some lizards were different in shape and color than others.

An adaptation is a structure or function that the organism has as a population because it increases the ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation in the lizard lab.

One example of an adaptation is the ability to change color. This is a survival adaptation because it helps the lizard to hide from predators and to catch prey.

Provide one evolutionary explanation for why lizards that are able to change color (i.e., the green) would have survived a longer time.

One evolutionary explanation is that lizards that are able to change color have a survival advantage over lizards that cannot change color. This is because they are better able to hide from predators and to catch prey.
