- Review your professor's guidelines:
 - Do they want you to write in 1st person point of view or third person point of view
 - Does your professor want you to include a table of contents?
 - Are running heads or page numbers required?
 - Is there a set word count or a word limit?
 - What margin size and line spacing did the professor recommend?
- Try to avoid unnecessary contractions. (i.e. Using "can't" instead of using "can not".)
- Make sure citation styles are consistent throughout your review paper

How to Write and Publish a Scientific Paper Robert A Day, Barbara Gastel, 2006-04-26 Guide on writing and submitting a scientific paper for graduates to professionals

Clinician's Guide to Medical Writing Robert B. Taylor, 2006-03-20 This book is for the clinician who wants to write. It is for the physician, physician assistant, or nurse practitioner who sees patients and who wants to contribute to the medical literature. You may be an assistant professor aspiring to promotion or a clinician in private practice who seeks the personal enrichment that writing can bring. If you are new to medical writing or even if you have been the author of some articles or book chapters and seek to improve your abilities, this book can help you. Who am I that I can make this assertion and write this book both fairly presumptuously? Here's my reasoning. As a practicing physician, writing has been my avocation, unlike the authors of many other writing books. I am not a journal editor. Over 14 years in private practice and 26 years in academic medicine, I have written all the major models described in this book: review articles, case reports, editorials, letters to the editor, book reviews, book chapters, edited books, authored books, and reports of clinical research studies. Most have been published. Not all. Perhaps my most significant qualification is not that I have managed to produce a lengthy curriculum vitae. In my opinion, what is more important for you, the reader, is that I have made all the errors. That's right, the mistakes.

How to Write and Publish a Scientific Paper Barbara Gastel, Robert A. Day, 2022-06-30

Thoroughly updated throughout, this classic practical text on how to write and publish a scientific paper takes its own advice to be as clear and simple as possible. Science is simply too important to be communicated in anything other than words of certain meaning. This clear, beautifully written, and often funny text is a must-have for anyone who needs to communicate scientific information, whether they're writing for a professor, other scientists, or the general public. The thoughtfully revised 9th edition retains the most important material, including preparing text and graphics, publishing papers, and other types of writing, and plenty of information on writing style, while adding up-to-date advice on copyright, presenting online, identifying authors, creating visual abstracts, and writing in English as a non-native language. A set of valuable appendices provides ready reference, including words and expressions to avoid, SI prefixes, a list of helpful websites, and a glossary. Students and working scientists will want to keep *How to Write and Publish a Scientific Paper* at their desks and refer to it at every stage of writing and publication.
