foundational not because they match reality little in nature behaves like Mendel's peas but because in England in the early years of the twentieth century a ferocious debate ended as it did On one side was the Cambridge biologist William Bateson who in Mendel's name wanted biology and society reorganized around the recognition that heredity is destiny On the other side was the Oxford biologist W F R Weldon who admiring Mendel's discoveries in a limited way thought Bateson's Mendelism represented a backward step since it pushed growing knowledge of the modifying role of environments internal and external to the margins Weldon's untimely death in 1906 before he could finish a book setting out his alternative vision is Radick suggests what sealed the Mendelian victory Bringing together extensive archival research with searching analyses of the nature of science and history *Disputed Inheritance* challenges the way we think about genetics and its possibilities past present and future     Investing Biology Pearson Education, 2002-11     **Forthcoming Books** Rose Arny, 2003     Books In Print 2004-2005 Ed Bowker Staff, Staff Bowker, Ed, 2004     **Books in Print Supplement** , 2002     American Book Publishing Record , 2002     **Solutions Manual: Modern Genetics** Francisco Jose Ayala, 1980     *Solutions Manual to Accompany Genetics* Peter James Russell, 1986     Solutions Manual for An Introduction to Genetic Analysis, Second Edition David T.
