know that the carbon impact of producing ten cheeseburgers is the same as one passenger travelling 167 miles on a London bus Or that high levels of air pollution lead to over 40 000 premature deaths and 6 million sick days each year But maybe the

future isn't as bleak as it seems. What if we told you that by turning down your thermostat by one degree you could save 320 kg of carbon dioxide annually? And that renewables are already generating a sizeable amount of energy around the world each year? In *The Fully Charged Guide to Electric Vehicles*, Clean Energy experts from around the globe explore how sustainable technology, everything from solar panels to wind turbines and electric vehicles, is getting cheaper, more effective and more available, and how by making everyday changes we could see the big switch in the coming decade. Presenting the latest innovations in the renewable energy and automotive industries, this book busts myths, provides suggestions and solutions for how to go green, explores how countries around the world are already improving the quality of life of their residents and looks at where clean energy will take us next.

[T]axing Greenhouse Gases Lex Fullarton,2019-03-30 Lex Fullarton takes a closer look at the three pillars of the sustainable development framework known as the Triple Bottom Line TBL The concept of the TBL is that for a project to be sustainable it must not simply be profitable in economic terms but it must also benefit society and enhance the natural environment In the 21st century the greatest threat to Earth s natural environment and the population of the planet is the rise of greenhouse gas emissions caused from burning fossil fuel as an energy source The rise of GHG emissions has resulted in a rise in the ambient air temperature of the Earth s atmosphere and is resulting in a significant change in climatic conditions on Earth Fullarton scrutinizes the problem of getting industry and governments to understand the significance of creating harmony within the TBL One of the main problems is that partisan politics tends to fragment the factors of the TBL rather than bring them together Fullarton takes a strong stand in suggesting that taxation systems which have traditionally been viewed primarily as a means of raising government finance can be effectively applied to influence industrial and consumer attitudes towards transiting away from polluting fossil fuel energy sources towards non polluting renewable energy use
