in 1995 by a group of instructors who were highly experienced at teaching fiber optics. They represented educational institutions, manufacturers, and commercial and government users of fiber optics including all types of fiber optic applications. All were concerned about the absence of standards for teaching fiber optic technicians and industry certifications to show their competence. The FOA was chartered to promote fiber optics through education, certification, and standards. Today the FOA is recognized around the world as the authority on fiber optic training and certification. The FOA has always tried to provide the world with sources of technically correct, unbiased information on fiber optics using both print and electronic media. For such a broad subject as testing fiber optic networks, we depend on the FOA Online Reference Guide on the FOA website www.foa.org, the largest and most widely used reference on fiber optics to supplement the material in this book. This book and the FOA Online Reference Guide provide a basic reference for testing fiber optic networks and a study guide for FOA Fiber Optic Specialist Certification in testing.

The FOA Reference Guide to Outside Plant Fiber Optics Jim Hayes, 2010-06-30 Updated January 2019. This book is a guide to the design and installation of outside plant fiber optic cabling networks. It was written as a reference book for instructors and students in classes aimed at FOA CFOT and CFOS OOSP specialist certification as well as a reference for anyone working in the field. This book offers expansive coverage on the components and processes of fiber optics as used in all outside plant applications, construction, and installation practices. Underground, buried, aerial, and submarine underwater installations are covered in detail, as is specialized testing for extreme long distance networks. Fiber to the home is given special treatment in an appendix where these new generation networks are described in detail. Complete OOSP curriculum materials are available from FOA.

Reference Guide to Fiber Optic Network Design Jim Hayes, 2017-05-09. IMSA is dedicated to providing quality certification programs for the safe installation, operation, and maintenance of public safety systems, delivering value for members by providing the latest information and education in the industry. IMSA has partnered with The Fiber Optic Association, the international professional society of fiber optics, to create fiber optic certifications that represent the state of the art in technology and practices. The FOA has been certifying technicians in fiber optics for more than two decades and is the most widely accepted certification worldwide. In partnership with the FOA, IMSA offers a unique certification that is recognized by both IMSA and FOA, providing individuals with certifications with the broadest acceptance in all applications.
