The Education Invasion Joy Pullmann, 2017-03-14 Most Americans had no idea what Common Core was in 2013 according to polls But it had been creeping into schools nationwide over the previous three years and children were feeling its effects They cried over math homework so mystifying their parents could not help them even in elementary school They read motley assortments of informational text instead of classic literature They dreaded the high stakes tests in unfamiliar formats that were increasingly controlling their classrooms How did this latest and most sweeping reform of American education come in mostly under the radar Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers and it led to a big tangle of history and politics intrigue and arrogance She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K 12 classes and how the Obama administration pressured states to adopt them Thus a federalized education scheme took root despite legal prohibitions against federal involvement in curriculum Common Core and its testing regime were touted as an absolute game changer in public education yet the evidence so far suggests that kids are actually learning less under it Why then was such a costly and disruptive agenda imposed on the nation's schools Who benefits And how can citizens regain local self governance in education so their children's minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats The Education Invasion offers answers and remedies

Ensuring Innovation in Diagnostics for Bacterial Infection Morel C., McClure L., Edwards S., Goodfellow V., Sandberg D., Thomas J., 2016-04-18 The inappropriate use of antibiotics is a primary cause of the ongoing increase in drug resistance amongst pathogenic bacteria The resulting decrease in the efficacy of antibiotics threatens our ability to combat infectious diseases Rapid point of care tests to identify pathogens and better target the appropriate treatment could greatly improve the use of antibiotics Yet there are few such tests currently available or being developed despite the rapid pace of medical innovation Clearly something is inhibiting the much needed development of new and more convenient diagnostic tools This study delineates priorities for developing diagnostics to improve antibiotic prescription and use with the goal of managing and curbing the expansion of drug resistance It calls for new approaches particularly in the provision of diagnostic devices and in doing so outlines some of the inadequacies in health science and policy initiatives that have led to the dearth of such devices The authors make the case that there is a clear and urgent need for innovation not only in the technology of diagnosis but also in public policy and medical practice to support the availability and use of better diagnostic tools This book explores the complexities of the diagnostics market from the perspective of both supply and demand unearthing interesting bottlenecks some obvious some more subtle It calls for a multifaceted and broad policy response and an overhaul of current practice so that the growth of bacterial resistance can be stemmed

Collecting for the Curriculum Amy J. Catalano, 2015-09-28 If you re a librarian charged with collecting curriculum materials and children s literature to support the Common Core State Standards then this book the only one that offers explicit advice on collection development in curriculum collections is for you While there are many publications on the Common Core for school librarians and K 12 educators no such literature exists for curriculum librarians at the post secondary level This book fills that gap standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards CCSS The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices The book begins with a primer on the CCSS and how curriculum librarians can support them Discussion of the Standards is then woven through chapters arranged by content area that share research based practices in curriculum development and instruction to guide you in curriculum selection Material types covered include games textbooks children s literature primary

sources counseling and nonfiction Additional chapters cover the management of curriculum collections testing collections and instruction and reference as well as how to support and collect for special needs learners Current practices in collection development for curriculum materials librarians are also reviewed The book closes with a discussion of the future of curriculum materials Monthly Catalogue, United States Public Documents ,1984 *The Politics of Weapons Inspections* Nathan E. Busch, Joseph F. Pilat, 2017-03-21 Given recent controversies over suspected WMD programs in proliferating countries there is an increasingly urgent need for effective monitoring and verification regimes the international mechanisms including on site inspections intended in part to clarify the status of WMD programs in suspected proliferators Yet the strengths and limitations of these nonproliferation and arms control mechanisms remain unclear How should these regimes best be implemented What are the technological political and other limitations to these tools What technologies and other innovations should be utilized to make these regimes most effective How should recent developments such as the 2015 Iran nuclear deal or Syria s declared renunciation and actual use of its chemical weapons influence their architecture The Politics of Weapons Inspections examines the successes failures and lessons that can be learned from WMD monitoring and verification regimes in order to help determine how best to maintain and strengthen these regimes in the future In addition to examining these regimes technological political and legal contexts Nathan E Busch and Joseph F Pilat reevaluate the track record of monitoring and verification in the historical cases of South Africa Libya and Iraq assess the prospects of using these mechanisms in verifying arms control and disarmament and apply the lessons learned from these cases to contemporary controversies over suspected or confirmed programs in North Korea Iran and Syria Finally they provide a forward looking set of policy recommendations for the future
