Routledge Library Editions: Curriculum Various,2021-07-09 Reissuing works originally published between 1971 and 1994 this collection includes books which offer a broad spectrum of views on curriculum both within individual schools and the wider issues around curriculum development reform and implementation Some cover the debate surrounding the establishment of the national curriculum in the UK while others are a more international in scope Many of these books go beyond theory to discuss practical issues of real curriculum changes at primary or secondary level The Set includes books on cross curricular topics such as citizenship and environment and also guidance careers life skills and pastoral care in schools A fantastic collection of education history with much still relevant today Revise for Geography GCSE OCR Specification A David Atkins,2002 Following the requirements of OCR Geography specification A this revision guide includes sample exam questions to build students confidence It can be used for additional practice either in the classroom or at home and offers advice on exam techniques map skills and data analysis European Dimensions and the Secondary School Curriculum Ivor Goodson,Veronica McGivney,2018-10-03 Originally published in 1985 Europe and the EEC seemed to be virtually synonymous for the majority of our population and the ambivalent feelings many people have about the Community together with the consistently bad press it received in the UK seemed to engender a hostility in educational circles towards teaching about Europe as a whole However if one of the aims of education is to increase children s awareness tolerance and understanding of the world about them to widen their experience and horizons then teaching about the wider world must have a place in the curriculum This book argues for education about Europe not necessarily in favour of Europe breaking down the national insularity of the UK curriculum and using Europe as one convenient window on the wider world
