arguing that superheroes merit serious study both within the academy and beyond. By examining the kinds of graphic novels that are embraced by the academy, this book explains how superhero stories are just as significant. Structured around key themes within superhero literature, the book delves into the features that make superhero stories a unique genre. The book also draws upon examples in comics and other media to illustrate the sociohistorical importance of superheroes, from the interplay of fans and creators to unique narrative elements that are brought to their richest fulfillment within the world of superheroes. A list of noteworthy superhero texts that readers can look to for future study is also provided. In addition to exploring the important roles that superheroes play in children's learning, the book also offers an excellent starting point for discussions of how literature is evolving and why it is necessary to expand the traditional realms of literary study. Enter the Superheroes will be of particular interest to English and composition teachers but also to scholars of popular culture and fans of superhero and comic book literature.

Storytelling Industries Anthony N. Smith, 2018-06-28 This book shows how the unique characteristics of traditionally differentiated media continue to determine narrative despite the recent digital convergence of media technologies. The author argues that media are now each largely defined by distinctive industrial practices that continue to preserve their identities and condition narrative production. Furthermore, the book demonstrates how a given medium's variability in institutional and technological contexts influences diverse approaches to storytelling. By connecting US film, television, comic book, and video game industries to their popular fictional characters and universes, including Star Wars, Batman, Game of Thrones, and Grand Theft Auto, the book identifies how differences in industrial practice between media inform narrative production. This book is a must read for students and scholars interested in transmedia storytelling.
