Berry, Janis E. Johnston, Paul W. Mielke Jr., 2014-04-11 The focus of this book is on the birth and historical development of permutation statistical methods from the early 1920s to the near present Beginning with the seminal contributions of R A Fisher E J G Pitman and others in the 1920s and 1930s permutation statistical methods were initially introduced to validate the assumptions of classical statistical methods Permutation methods have advantages over classical methods in that they are optimal for small data sets and non random samples are data dependent and are free of distributional assumptions Permutation probability values may be exact or estimated via moment or resampling approximation procedures Because permutation methods are inherently computationally intensive the evolution of computers and computing technology that made modern permutation methods possible accompanies the historical narrative Permutation analogs of many well known statistical tests are presented in a historical context including multiple correlation and regression analysis of variance contingency table analysis and measures of association and agreement A non mathematical approach makes the text

House of Lords - Select Committee on the Olympic and Paralympic Legacy: Keeping the Flame Alive: the Olympic and Paralympic Legacy - HL 78 Great Britain: Parliament: House of Lords: Select Committee on Olympic and Paralympic Legacy, 2013-11-18 Since the Games the same political impetus and agreed deadlines no longer exist and many aspects of legacy are in danger of faltering whilst some have fallen by the wayside There

is confusion on the timeframes and targets involved in delivery and a lack of clear ownership of legacy as a whole The committee recommends that a minister be given overall responsibility for the Olympic legacy enabling greater co ordination across Whitehall departments It also believes the Mayor of London should be given control over further development of east London and the Olympic Park in Stratford There is also a warning over the geographic disparity in the economic benefits stemming from the Games While London and the south east of England benefited with nearly 15 000 additional jobs just seven were created in the North East London 2012 may have promised to inspire a generation but the committee says it found little evidence of a step change in sports participation levels across the UK UK Sport the body that invests approximately 100m in high performance athletes and teams each year and decides funding levels for Olympic and Paralympic sports is also criticised The committee believes not enough is being done by UK Sport to help both team and emerging sports The no compromise approach of UK Sport has delivered medals for Team GB and has clearly improved top end importance This approach however has an inherent bias against team sports and fails to help emerging sports some of which such as handball and volleyball generated real enthusiasm at London 2012
