INSPECTING YOUR RIFLE

- When you inspect your rifle, you should first check to be certain it is unloaded. To do this, pump the rifle with your finger on the trigger and rotate the magazine guard until the magazine is in a safe position. Release the magazine release and remove the magazine (Figure 5).
- Next, by changing handle of the rifle butt (Figure 6), down and hold the lower portion of the butt down (Figure 7) while you rotate pressure on the charging handle. This will lock the butt in the open position. Rotate charging handle fully forward until it locks and remove the gun from butt open.
- Place safety selector lever on SAFE (Fig 8).

NOTE: When handling the M4P to do it, if the safety selector does not usually rotate to the "SAFE" position, DO NOT attempt to force it into "SAFE" while keeping the magazine pointed in a safe direction. Remove the magazine and lock your butt open as instructed here and then rotate the safety selector to "SAFE" before proceeding.

NOTE: Pull the charging handle to both sides uniformly. The left side contains the lock that keeps the charging handle locked forward when it's not in use (Figure 9).

- Look into the receiver and check the chamber to be sure no cartridges are present (Figure 10).
- You must follow this procedure every time a trigger leaves your hand, is changed, handed to you or another person, transported or stored.
