**Inside the Black Box of Classroom Practice** Larry Cuban, 2013-03-01 2015 Outstanding Book Award Association for Educational Communications Technology AECT A book that explores the problematic connection between education policy and practice while pointing in the direction of a more fruitful relationship Inside the Black Box of Classroom Practice is a provocative culminating statement from one of America's most insightful education scholars and leaders Inside the Black Box of Classroom Practice takes as its starting point a strikingly blunt question With so many major structural changes in U.S. public schools over the past century why have classroom practices been largely stable with a modest blending of new and old teaching practices leaving contemporary classroom lessons familiar to earlier generations of schoolgoers It is a question that ought to be of paramount interest to all who are interested in school reform in the United States It is also a question that comes naturally to Larry Cuban whose much admired books have focused on various aspects of school reform their promises wrong turns partial successes and troubling failures In this book he returns to this territory but trains his focus on the still baffling fact that policy reforms no matter how ambitious or determined have generally had little effect on classroom conduct and practice Cuban explores this problem from a variety of angles Several chapters look at how teachers in responding to major policy initiatives persistently adopt changes and alter particular routine practices while leaving dominant ways of teaching largely undisturbed Other chapters contrast recent changes in clinical medical practice with those in classroom teaching comparing the practical effects of varying medical and education policies The book's concluding chapter distills important insights from these various explorations taking us inside the black box of the book's title those workings that have repeatedly transformed dramatic policy initiatives into familiar and largely unchanged classroom practices **McAs Test**
