

1 The engine governor

1.1 Engine governor ECU 7 – ADEC

General information

To control and regulate a diesel engine, a large number of measurement variables and control signals have to be recorded, evaluated and processed. This information can either be generated on the engine side (e.g. operating data such as pressure and temperatures) or on the system side, i.e. by devices of a higher-order system, which determine how the diesel engine behaves.
