**Suicidal behavior and depression among perinatal women: Research, Prevention, Intervention and Treatment** Yari Gvion,Sami Hamdan ,Vita

Poštuvan,2024-10-01 Suicide is a multifaceted phenomenon with numerous contributing and facilitating factors and variables Despite motherhood serving as a potential protective factor against suicidal tendencies a notable prevalence of suicidality persists among pregnant and postpartum women making suicide a leading cause of death among women with postpartum depression PDD Furthermore numerous women experience emotional challenges during pregnancy which often persist into the postpartum phase thus making them also susceptible to depression and suicidality This Research Topic is dedicated to studies exploring various approaches to suicidal behavior depression as well as of non suicidal self injury NSSI among pregnant and postpartum women The purpose of this Research Topic is to elucidate comprehensive analyses of extant knowledge and empirical data about models theories and specific dimensions and variables that may help us increase the understanding of suicidal phenomena among perinatal women pregnant and postpartum The specific goal is to identify characteristics that may be used to develop prevention and intervention methods among this at risk population

10th International Conference on Turbochargers and Turbocharging Institution of Mechanical Engineers,2012-05-11 This book presents the papers from the latest international conference following on from the highly successful previous conferences in this series held regularly since 1978 Papers cover all current and novel aspects of turbocharging systems design for boosting solutions for engine downsizing The focus of the papers is on the application of turbocharger and other pressure charging devices to spark ignition SI and compression ignition CI engines in the passenger car and commercial vehicles Novel boosting solutions for diesel engines operating in the industrial and marine market sectors are also included The current emission legislations and environmental trends for reducing CO2 and fuel consumption are the major market forces in the transport land and marine and industry sectors In these market sectors the internal combustion engine is the key product where downsizing is the driver for development for both SI and CI engines in the passenger car and commercial vehicle applications The more stringent future market forces and environmental considerations mean more stringent engine downsizing thus novel systems are required to provide boosting solutions including hybrid electric motor and exhaust waste energy recovery systems for high efficiency response reliability durability and compactness etc For large engines the big challenge is to enhance the high specific power and efficiency whilst reducing emission levels Nox and Sox with variable

quality fuels This will require turbocharging systems for very high boost pressure efficiency and a high degree of system flexibility Presents papers from all the latest international conference Papers cover all aspects of the turbocharging systems design for boosting solutions for engine downsizing The focus of the papers is on the application of turbocharger and other pressure charging devices to spark ignition SI and compression ignition CI engines in the passenger car and commercial vehicles

**Sustainable Vehicle Technologies** Institution of Mechanical Engineers,2012-11-06 This book contains the papers from the IMechE s Sustainable Vehicle Technologies 2012 conference An innovative technical conference organised by the Automobile Division of the IMechE it follows on from the 2009 Low Carbon Vehicle conference which established a high standard with presentations primarily focussed on powertrain technology The conference examines the latest advances in technology with a view towards understanding the consequences of carbon dioxide reduction over the entire vehicle lifecycle Papers cover all aspects of the finite resources available for vehicle production operation and recycling Presents the papers from this leading conference Covers life time emissions and sustainability over the entire product life cycle Considers all areas of environmental pollution in addition to the goals for delivering low carbon vehicles

*River Flow 2016* George Constantinescu,Marcelo Garcia,Dan Hanes,2016-06-22 Understanding and being able to predict fluvial processes is one of the biggest challenges for hydraulics and environmental engineers hydrologists and other scientists interested in preserving and restoring the diverse functions of rivers The interactions among flow turbulence vegetation macroinvertebrates and other organisms as well as the transport and retention of particulate matter have important consequences on the ecological health of rivers Managing rivers in an ecologically friendly way is a major component of sustainable engineering design maintenance and restoration of ecological habitats To address these challenges a major focus of River Flow 2016 was to highlight the latest advances in experimental computational and theoretical approaches that can be used to deepen our understanding and capacity to predict flow and the associated fluid driven ecological processes anthropogenic influences sediment transport and morphodynamic processes River Flow 2016 was organized under the auspices of the Committee for Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR Since its first edition in 2002 the River Flow conference series has become the main international event focusing on river hydrodynamics sediment transport river engineering and restoration Some of the highlights of the 8th International Conference on Fluvial Hydraulics were to focus on inter disciplinary research involving among others ecological and biological aspects relevant to river flows and processes and to emphasize broader themes dealing with river sustainability River Flow 2016 extended abstract book 854 pages full paper CD ROM 2436 pages contains the contributions presented during the regular sessions covering the main conference themes and the special sessions focusing on specific hot topics of river flow research and will be of interest to academics interested in hydraulics hydrology and environmental engineering
