Our world is about to change In Digital Destiny How the New Age of Data Will Change the Way We Live Work and
Communicate Shawn DuBravac chief economist and senior director of research at the Consumer Electronics Association CEA
argues that the groundswell of digital ownership unfolding in our lives signals the beginning of a new era for humanity
Beyond just hardware acquisition the next decade will be defined by an all digital lifestyle and the Internet of Everything
where everything from the dishwasher to the wristwatch is not only online but acquiring analyzing and utilizing the data that
surrounds us But what does this mean in practice It means that some of mankind's most pressing problems such as hunger
disease and security will finally have a solution It means that the rise of driverless cars could save thousands of American
lives each year and perhaps hundreds of thousands more around the planet It means a departure from millennia old practices
such as the need for urban centers It means that massive inefficiencies such as the supply chains in Africa allowing food to
rot before it can be fed to the hungry can be overcome It means that individuals will have more freedom in action work
health and pursuits than ever before *Energy Science and Applied Technology ESAT 2016* Zhigang Fang, 2016-10-14 The
2016 International Conference on Energy Science and Applied Technology ESAT 2016 held on June 25-26 in Wuhan China
aimed to provide a platform for researchers engineers and academicians as well as industrial professionals to present their
research results and development activities in energy science and engineering and its applied technology The themes
presented in Energy Science and Applied Technology ESAT 2016 are Technologies in Geology Mining Oil and Gas Renewable
Energy Bio Energy and Cell Technologies Energy Transfer and Conversion Materials and Chemical Technologies
Environmental Engineering and Sustainable Development Electrical and Electronic Technology Power System Engineering
Mechanical Manufacturing Process Engineering Control and Automation Communications and Applied Information

Application System Test Diagnosis Detection and Monitoring Recognition Video and Image Processing *Recent Advances
in Information and Communication Technology 2017* Phayung Meesad, Sunantha Sodsee, Herwig Unger, 2017-06-17 This book
includes selected contributions related to big data and data networking presented at the 13th International Conference on
Computing and Information Technology IC2IT which was held at the Arnoma Grand Hotel Bangkok Thailand July 6-7 2017
The aim of the conference was to present emerging algorithms methods and technologies with a high degree of originality
novelty and innovation addressing the conference theme Mastering Data and Networking Section 1 and 2 discuss various
aspects of data mining and corresponding applications Section 3 focuses on speed and overhead networking optimisation
problems as well as energy problems of autonomous systems which are becoming increasingly important The key to
addressing these problems is properly determining critical parameters Section 4 sheds light on natural language processing

Technology And The Disruption Of Higher Education

Henry C Lucas, Jr, 2016-07-07 Universities for years have been the bright spot in our educational system Today these institutions are under siege from multiple constituencies including students parents legislators government officials and their own faculties Education has historically been a way for students to improve their lives and fortunes However the rising costs of college are a barrier to access for many students reducing their chances for upward mobility Is technology the solution or is it just another costly problem for universities The purpose of this book is to explore how new technology has the potential to transform higher education However this same technology also has the potential to disrupt universities Much depends on how administrators faculty and students apply technologically enhanced learning Technology and the Disruption of Higher Education presents details on MOOCs blended flipped and online classes and their role in transforming higher education based on the author's experiences teaching all of these types of courses These technology enabled approaches to teaching and learning offer tremendous opportunities to schools but they also threaten the traditional university The book identifies some of these threats and opportunities and offers suggested strategies to take advantage of the technology Is this technology enough to save the university system While new ways of teaching and learning are exciting they are only part of the puzzle Radical change beyond what happens in the classroom is needed if our higher education system is to continue to flourish and some of these ideas are discussed in the last chapter of the book The book is a call to action for educators to realize that the technology is both transformational and disruptive and that some universities are going to fail in the next 15 years
