Requiem for the Santa Cruz Robert H. Webb, Julio L. Betancourt, R. Roy Johnson, Raymond M. Turner, 2021-11-30 In prehistoric times the Santa Cruz River in what is now southern Arizona saw many ebbs flows and floods It flowed on the surface meandered across the floodplain and occasionally carved deep channels or arroyos into valley fill Groundwater was never far from the surface in places outcropping to feed marshlands or ci negas In these wet places arroyos would heal quickly as the river channel revegetated the thriving vegetation trapped sediment and the channel refilled As readers of Requiem for the Santa Cruz learn these aridland geomorphic processes also took place in the valley as Tucson grew from mud walled village to modern metropolis with one exception historical water development and channel changes proceeded hand in glove each taking turns reacting to the other eventually lowering the water table and killing a unique habitat that can no longer recover or be restored Authored by an esteemed group of scientists Requiem for the Santa Cruz thoroughly documents this river the premier example of historic arroyo cutting during the late nineteenth and early twentieth centuries when large floodflows cut down through unconsolidated valley fill to form deep channels in the major valleys of the American Southwest Each chapter provides a unique opportunity to chronicle the arroyo legacy evaluate its causes and consider its aftermath Using more than a collective century of observations and collections the authors reconstruct the circumstances of the river's entrenchment and the groundwater mining that ultimately killed the marshlands a veritable mesquite forest and a birdwatcher's paradise Today communities everywhere face this conundrum do we manage ephemeral rivers through urban areas for flood control or do we attempt to restore them to some previous state of perennial naturalness Requiem for the Santa Cruz carefully explores the legacies of channel change groundwater depletion flood control and nascent attempts at river restoration to give a long term perspective on management of rivers in arid lands Tied together by authors who have committed their life's work to the study of aridland rivers this book offers a touching and scientifically grounded requiem for the Santa Cruz and every southwestern river
