Library of Medicine Catalog National Library of Medicine (U.S.), 1966 **Science Inquiry, Argument and Language**
, 2019-02-18 Science Inquiry Argument and Language describes research that has focused on addressing the issue of
embedding language practices within science inquiry through the use of the Science Writing Heuristic approach In recent
years much attention has been given to two areas of science education scientific argumentation and science literacy The
research into scientific argument have adopted different orientations with some focusing on science argument as separate to
normal teaching practices that is teaching students about science argument prior to using it in the classroom context while
others have focused on embedding science argument as a critical component of the inquiry process The current emphasis on
science literacy has emerged because of greater understanding of the role of language in doing and reporting on science
Science is not viewed as being separate from language and thus there is emerging research emphasis on how best to
improving science teaching and learning through a language perspective Again the research orientations are parallel to the
research on scientific argumentation in that the focus is generally between instruction separate to practice as opposed to
embedding language practices within the science classroom context **Catalog** National Library of Medicine (U.S.), 1966
