

STARTING

Illust. 3-8. Starting position.

Starting

Illust. 3-8 shows the carburetor choke closed, starting shut-off valve closed (which is attached to the choke shaft), and the throttle half open. The economizer valve is open, regulator low pressure valve open and the high pressure valve maintaining a pressure of 8-9 psi as the engine is being cranked.

Vacuum developed (as the engine is being cranked) in the intake manifold,

carburetor, vaporized fuel passage to carburetor and low pressure chamber has moved the low pressure diaphragm against the push pin with sufficient force to open the low pressure valve.

Vapor fuel is drawn past the vaporized fuel passage, the starting fuel adjusting screw, through the starting fuel passage of the carburetor where it is mixed with clean air, drawn through the choke air valve in the choke plate and on through the intake manifold to the engine cylinders.
