Standards & Objectives

Addressed in Sound Energy

Overarching Question: How does sound energy travel?

Standard Addressed:
4-PS3-2 Make observations to provide evidence that energy can be from place to place by sound, light, heat, and electric currents.

Objectives:

Station 1
To make observations and provide evidence that a sound is a wave.

Station 2
To make observations and provide evidence that sound travels in all directions.
To understand that sound waves travel occur through compression and rarefaction.

Station 3
To make observations and find evidence that increasing force/energy increases the amplitude.

Station 4
To make observations and find evidence that when sound waves enter a new medium, the waves are longer, and the sound produced has a lower frequency.

Station 5
To make observations and find evidence that dense materials conduct sound better than less dense materials and that sound bounces off flat surfaces better than bumpy and/or rough surfaces.

Station 6
To make observations and find evidence that sound travels best through solids, then through liquids, and worst through gases.

2. Which materials are transparent, translucent, and opaque?
3. Which materials reflect light?
4. What is refraction?
5. What is color?
6. Light Reading

Heat 8-11 days
