

What is the world made of?

Elementary Science

Big Idea: Solids, liquids, and gas is all matter with different properties.

Grade Level: Third

Rationale: I am teaching this lesson so students will understand that different types of matter have different properties. Students are learning this material so that they will be able to explain in their own words the properties of matter. This connects to their lives because our world is made up of matter.

NC Essential Standard(s): 3.P.2.2 Compare solids, liquids, and gases based on their basic properties.

Next Generation Science Standard(s):

2-PS1-1. **Plan and conduct an investigation to describe and classify different kinds of materials by their observable properties.** [Clarification Statement: Observations could include color, texture, hardness, and flexibility. Patterns could include the similar properties that different materials share.]

Instructional Objective: Students will be able to compare solids, liquids, and gases based on their basic properties. Students will be able to name one basic property for solids, liquids and gases. Students will be able to point out objects of matter that they see in everyday life and will be able to compare the objects.

Prerequisite knowledge and skills: Students will already know that matter takes up space and can be presented in different forms. Students will know that matter can be a solid, a liquid, or a gas.
