International Production (Routledge Revivals) John H. Dunning,2014-11-13 John Dunning s general theory of international production first propounded in the late 1970 s has generated considerable debate This work thoughtfully reassesses the paradigm and extends the analysis to embrace issues of theoretical and empirical importance In a collection of essays the changing characteristics of international production are examined and an interdisciplinary approach suggested for understanding the multinational enterprise in the world economy This book first published in 1988 will be of value not only to economists and international business analysts but to scholars in other fields notably organizational marketing and management specialists **Systems of Innovation** Charles Edquist,2013-01-11 The systems of innovation approach is

considered by many to be a useful analytical approach for better understanding innovation processes as well as the production and distribution of knowledge in the economy It is an appropriate framework for the empirical study of innovations in their contexts and is relevant for policy makers This text is the result of the work within an international interdisciplinary network or working seminar with the task of building a more solid and sophisticated conceptual and theoretical

foundation for the continued study of innovations in a systemic context The book has three parts The first presents an overview and tries to work out some conceptual problems In the second the systems of innovation approach is related to innovation theory Part three is devoted to increasing understanding of the functioning and dynamics of systems of innovation There is also an introduction where the genesis and anatomy of different systems of innovation approaches are discussed and where the systems of innovation approach is characterized in nine dimensions

The Development of the Economies of Continental Europe 1850-1914 (Routledge Revivals) Alan Milward, S. Saul, 2012-08-06 This work first published in 1977 is a reissue of a trailblazing work the first textbook of economic history to deal comprehensively with the economic development of the whole continent in this period and to do so from a continental rather than a British perspective But it is more than merely a textbook it is an interpretative synthesis of the wide range of research on this subject in many countries As such it will be an indispensable guide for teachers and will extend and improve the scope of teaching by making available for the first time in English the results of continental research In addition it is a work of fundamental interest to economists in which theories and hypotheses of economic development are now examined in a much wider historical context In this way the book is an exploration of the objective validity of earlier theories and the starting point for further research into economic development and European history The work covers the continental development of the German and French economies after 1870 and then in that context analyses the development of the smaller western economies It then considers the relatively underdeveloped economies of eastern and southern Europe and includes the first attempt at a synthesis of economic development before 1914 in the Balkans It concludes with an analysis of the international economy and its relationship to the economic development of the continent

Science at the Cross Roads (Routledge Revivals) N. Bukharin et al., 2013-11-05 The papers given by the Soviet Delegation to the Second International Congress of the History of Science and Technology in London in 1931 headed by N I Bukharin exerted a profound influence on Western historiography of science Perhaps the most influential contribution was that of Hessen who made a long and classical statement of Marxist historiography taking Isaac Newton as his example The collection which appeared in Britain at the height of the Depression fostered an acute social awareness and a heated debate among many working scientists Accredited by some as the starting point of a new evaluation of the history of science the book reflects the huge social and economic divide between Socialism and Capitalism present at the time of publication and its influence on intellectual culture and scientific advancement

The Conservatives' Economic Policy (Routledge Revivals) Grahame Thompson, 2014-11-13 What happened to economic policy during the first five years of Mrs Thatcher's government Most commentators have emphasised the radical changes wrought in economic theory and policy over the period from 1979 The left saw this as heralding the introduction of the social market economy and authoritarian populism the right saw it as evangelical monetarism and a new beginning This book first published in 1986 challenges the notion that there was a revolution in economic policy making It emphasises the constraints on economic policy formation and

the ironies that these have thrown up with respect to the Conservatives attempts at changing the course of the economy The book argues that the Thatcher government had not been able to implement a great deal of its rhetoric This book is ideal for students of economics and politics

Integrated Models in Geography (Routledge Revivals) Richard Chorley, Peter Haggett, 2013-11-05 First published in 1967 this book explores the theme of geographical generalization or model building It is composed of five of the chapters from the original Models in Geography published in 1967 The first chapter broadly outlines this theme and examines the nature and function of generalized statements ranging from conceptual models to scale models in a geographical context The following chapters deal with mixed system model building in geography wherein data techniques and concepts in both physical and human geography are integrated The book contains chapters on organisms and ecosystems as geographical models as well as spatial patterns in human geography This text represents a robustly anti idiographic statement of modern work in one of the major branches of geography

Urban Systems (Routledge Revivals) C S Bertuglia, G. Leonardi, S. Occelli, G. A. Rabino, R. Tadei, Alan Wilson, 2013-10-18 This edited collection first published in 1987 provides a comparative analysis of different approaches to urban modelling and lays the foundations for the possibility of integration and a more unified field The first part contextualises the development of the field of urban systems modelling focusing on the variety of approaches and possible implications of this on the future of research and methodology Next the editors consider economic and non economic approaches followed by an analysis of spatial interaction based approaches Providing an overview to the field and research literature the overarching argument is that

there should be an integrated methodological approach to urban system modelling *Handbook on the Geographies of Innovation* Richard Shearmur, Christophe Carrincazeaux, David Doloreux, 2016-11-25 The geography of innovation is changing Firstly it is increasingly understood that innovative firms and organizations exhibit a wide variety of strategies each differently attuned to diverse geographic contexts Secondly and concomitantly the idea that cities clusters and physical proximity are essential for innovation is evolving under the weight of new theorizing and empirical evidence The aim of this handbook is to break with the many ideas and concepts that emerged during the course of the 1980s and 1990s and to fully take into account the new reality of the internet mobile communication technologies personal mobility and globalization The handbook gathers a new generation of ideas and authors to contribute to the debate providing an empirically grounded critical appraisal of the prevailing knowledge on the geography of innovation The 28 original chapters written by a diverse range of scholars with widely differing views present fresh empirical evidence and new perspectives relating to how innovation plays out across space in an age where mobility has increased information is ubiquitous and globalisation has been realised Overall the dialogue between existing theory and new possibilities provides a unique and challenging appraisal of the connection between innovation agglomeration and space Offering cutting edge ideas in an accessible format this will be an ideal resource for students and scholars of economic geography and innovation studies The empirical evidence and analysis will also be of great value for policymakers and government officials Contributors include B T Asheim H W Aslesen A Bain P A Balland N Bradford A Bramwell C Brennan Horley S Breschi C Carrincazeaux C Chaminade R Comunian C De Fuentes D Doloreux D Eckert A Faggian M Ferru R D Fitjar K Flanagan C Gibson M Grillitsch M Grossetti G Harirchi F Huber A Isaksen S Jewel J Karlsen N Komninos J L Klein N Lee F Lissoni M Maisonobe J Mattes P McCann C T Noumedem R Ortega Argil s M Plechero A Rallet A Rodriguez Pose R Shearmur H L Smith B Spigel J Tallec E Tranos D G Tremblay F T dtling M Trippl E Uyarra C Yang C Wilkie D A Wolfe **Community Architecture (Routledge Revivals)** Nick Waters, Charles Knevitt, 2013-09-05 First published in 1987 this title was one of the first to explore the emerging popular movement of Community Architecture championed by Prince Charles which gained momentum throughout Britain in the 1970s and 1980s The conceptual framework rests fundamentally on the principle that the built environment is most effective when those who live in a particular area are actively engaged with its creation and daily administration A work that has influenced policy makers and planning legislation Community Architecture remains one of the key reference works for student architects and planners Industrial Innovation, Networks, and Economic Development Anant Kamath, 2014-11-27 This book offers an innovative examination of how low technology industries operate Based on extensive fieldwork in India the book fuses economic and sociological perspectives on information sharing by means of informal interaction in a low technology cluster in a developing country In doing so the book sheds new light on settings where economic relations arise as emergent properties of social relations This book examines industrial innovation and microeconomic network behaviour

among producers and clusters perceiving knowledge diffusion to be a socially spatial as much as a geographically spatial phenomenon This is achieved by employing two methods simulation modelling and quantitative qualitative and historical social network analysis The simulation model based on its findings motivates two empirical studies one descriptive case and one network study of low tech rural and semi urban traditional technology clusters in Kerala state in southern India These cases demonstrate two contrasting stories of how social cohesion either supports or thwarts informal information sharing and learning This book pushes towards an economic sociology approach to understanding knowledge diffusion and technological learning which perceives innovation and learning as being more social processes than the mainstream view perceives them to be In doing so it makes a significant contribution to the literature on defensive innovation and the role of networks in technological innovation and knowledge diffusion as well as to policy studies of Indian small firm and traditional technology clusters
