**Information Operations: Field Manual (Fm) 3-13** Department Of The Army, 2019-02-28 Field Manual FM 3 13 Information Operations serves as the Army s foundational doctrine for information operations The purpose of this edition is to better align Army doctrine with joint doctrine while recognizing the unique requirements of information operations in support of the land force FM 3 13 discusses the conduct of information operations in today s complex global security environment which requires a dynamic range of capabilities and skills from technological capabilities such as cyberspace operations to individual capabilities such as speaking a foreign language from technical skills such as those required to defend computer networks to interpersonal skills such as those required to conduct Soldier and leader engagements This manual provides overarching guidance to effectively integrate information operations into the operations process in order to create decisive effects in the information environment Why buy a book you can download for free We print this book so you don t have to First you gotta find a good clean legible copy and make sure it s the latest version not always easy Some documents found on the web are missing some pages or the image quality is so poor they are difficult to read We look over each document carefully and replace poor quality images by going back to the original source document We proof each document to make sure it s all there including all changes If you find a good copy you could print it using a network printer you share with 100 other people typically its either out of paper or toner If it s just a 10 page document no problem but if it s 250 pages you will need to punch 3 holes in all those pages and put it in a 3 ring binder Takes at least an hour It s much more cost effective to just order the latest version from Amazon com This book includes original commentary which is copyright material Note that government documents are in the public domain We print these large documents as a service so you don t have to The books are compact tightly bound full size 8 1 2 by 11 inches with large text and glossy covers 4th Watch Publishing Co is a HUBZONE SDVOSB <https://usgovpub.com> [Field Manual FM 3-13 Information Operations December 2016](#) United States Government US Army, Us Army, 2017-03-21 Field Manual FM 3 13 Information Operations December 2016 Over the past two decades Army information operations IO has gone through a number of doctrinal evolutions explained in part by the rapidly changing nature of information its flow processing dissemination impact and in particular its military employment At the same time a decade and a half of persistent conflict and global engagement have taught us a lot about the nature of the information environment especially that in any given area of operations this environment runs the gamut from the most technologically advanced to the least Army units employ IO to create effects in and through the information environment that provide commanders a decisive advantage over adversaries threats and enemies in order to defeat the opponent s will Simultaneously Army units engage with and influence other relevant foreign audiences to gain their support for friendly objectives Commanders IO contributes directly to tactical and operational success and supports objectives at the strategic level This latest version of FM 3 13 returns to the joint definition of IO although it

clarifies that land forces must do more than affect threat decision making if they are to accomplish their mission They must also protect their own decision making and the information that feeds it align their actions messages and images and engage and influence relevant targets and audiences in the area of operations While the term inform and influence activities has been rescinded many of the principles espoused in the last version of FM 3 13 carry forward especially the synchronization of information related capabilities IRCs IRCs are those capabilities that generate effects in and through the information environment but these effects are almost always accomplished in combination with other information related capabilities Only through their effective synchronization can commanders gain a decisive advantage over adversaries threats and enemies in the information environment While capabilities such as military information support operations combat camera military deception operations security and cyberspace operations are readily considered information related commanders consider any capability an IRC that is employed to create effects and operationally desirable conditions within a dimension of the information environment

**Information Operations: Doctrine, Tactics, Techniques, and Procedures (FM 3-13 / 100-6)** Department Army, 2012-11-30 Information is an element of combat power. IO is a prime means for achieving information superiority. Users of FM 3-13 must be familiar with the military decision-making process established in FM 5-0, Army Planning and Orders Production, the operations process established in FM 3-0, Operations, and commander's visualization described in FM 6-0, Mission Command. It also establishes doctrine and TTP for the IO elements of operations security and military deception. This manual implements joint IO doctrine established in JP 3-13, Joint Doctrine for Information Operations; JP 3-54, Joint Doctrine for Operations Security; and JP 3-58, Joint Doctrine for Military Deception. This manual establishes the following as the definition of IO used by Army forces: Information operations is the employment of the core capabilities of electronic warfare, computer network operations, psychological operations, military deception, and operations security in concert with specified supporting and related capabilities to affect or defend information and information systems and to influence decision making.
