Wagner is not given to understatement. While bitcoin is "the most exciting technology since the Internet," he says, eBay is "a giant bloodsucking corporation" and free speech "a popular myth." He is similarly excitable when predicting the future of bitcoin. "I knew it wasn't a stock and wouldn't go up and down," he explains. "This was something that was going to go up, up, up."

For a while, he was right. Through 2009 and early 2010, bitcoins had no value at all, and for the first six months after they started trading in April 2010, the value of one bitcoin stayed below 14 cents. Then, as the currency gained viral traction in summer 2010, rising demand for a limited supply caused the price on online exchanges to start moving. By early November, it surged to 36 cents before settling down to around 29 cents. In February 2011, it rose again and was mentioned on *Slashdot* for achieving "dollar parity"; it hit \$1.06 before settling in at roughly 87 cents.

In the spring, catalyzed in part by a much-linked *Forbes* story on the new "crypto currency," the price exploded. From early April to the end of May, the going rate for a bitcoin rose from 86 cents to \$4.89. Then, after Gawker published a story on June 1 about the currency's popularity among online drug dealers, it more than tripled in a week, soaring to about \$27. The

in the front of the room. And the strange part is that the audience gives control over to the unknown. They have not seen the movie before. They haven't heard the lecture or seen the play. It's an act of respect and an act of hope—and it's amazing. There are only a few things in the world that can silence a room full of people, and the beginning of a performance is one of them.

I get chills when it happens even if, like last week, I'm just in the back row of a movie theater about to watch *Crash: High Voltage*, a hopelessly silly action film. Even there, right after the previews and before the opening credits start, the sensation of listening to a crowded room trying to be silent is bizarre and magical at the same time. On this day, however, I broke the silence. A packet M&M escaped from the stash in my hand, cracking to the floor. The sound of each and every bounce, as it rolled down to the front row, echoed in the ears of annoyed strangers. My clumsy violations, so embarrassing as they were, demonstrated how silence is rare, special, and easy to break.

And when I'm the speaker, I know that special moment is the only time I will have the entire audience's full attention. Unless an alien spaceship crash-lands on stage midway through the talk, the silence before I begin is the most powerful moment I have. What defines how well I'll do starts with how I use the power
