Geological and Natural History Survey of Minnesota, 1899 *Catalog of Copyright Entries* Library of Congress. Copyright

Office, 1907 *Math Wars* Carmen Latterell, 2004-12-30 This book is written for parents and other interested parties so that

they can understand the great debate taking place in many states in this country about how to teach basic math The debate

centers around the standards written by the National Council of Teachers of Mathematics NCTM which call for a radically

different approach to mathematics education Because the issues are so heated between the NCTM oriented curricula and

traditional curricula the curricula that NCTM oriented replaced the term Math Wars was coined to describe them Parents are

concerned about their children's math learning Teachers are concerned about math teaching When parents see what

children are bringing home under the new curriculum it is clear that their children are not working on the same mathematics

that parents remember from the time when they were in school But the problem goes beyond grades K 12 Post secondary

mathematics courses are the fear of many students The standards created by the NCTM do not necessarily prepare students

for success either on SATs or in college Besides lack of knowledge about mathematics education many parents have an

additional problem in that they feel they lack knowledge in mathematics itself This is very intimidating thus it is difficult for

parents to do anything about the confusing state of mathematics education This book provides some answers *American*
