Miller,2018-10-03 Originally published in 1984 This book charts important changes brought about by teachers in the way  
literature is read and written about in schools Rooted in experiences of inner city schools it is extremely practical and  
especially valuable for the multi ethnic classroom The writers all of whom are experienced teachers of English believe  
however that all schools need to respond to the cultural racial and linguistic diversity of British society whether their own  
populations are homogeneous or mixed By concentrating on real classrooms real lessons and real children the book shows  
how particular ideas can be put into practice It approaches theories of reading and of literature through specific examples of  
lively and successful practice and argues the case for the centrality of literature and literacy to the curriculum The book  
includes lists of resources books to read with children and books for teachers to read for themselves to deepen their  
understanding of the ideas and their confidence in adapting them for their own classrooms Throughout the book continuities  
are emphasized between life and literature between reading and writing and between learning to read becoming better at it  
and studying literature     **Routledge Library Editions: Curriculum** Various,2021-07-09 Reissuing works originally

within individual schools and the wider issues around curriculum development reform and implementation Some cover the

The Set includes books on cross curricular topics such as citizenship and environment and also guidance careers life skills  
and pastoral care in schools A fantastic collection of education history with much still relevant today     **Principles of
